

1.1.1 Curricula Developed and implemented have relevance to the local, national, regional and global developmental needs which is reflected in Program outcomes (POs), Program Specific Outcomes (PSOs) and Course Outcomes (Cos) of the Programmes offered by the University

Description

Chhatrapati Shahu Ji Maharaj University offers more than 80 various degree programmes and approximately 42 diploma and certificate programmes in diverse branches/subjects. These programmes have been actively thriving ever since in tandem with the changing and challenging demands of the academia and the industry at local/regional/national and global levels. The programmes aim at educating the students to make them suitable for rendering their services to satisfy the local, regional, national and international research oriented and developmental needs. To mention a few, the goal of Health Sciences is to provide training in specific clinical-related health speciality areas and to prepare capable professionals who can assume roles as educators, researchers and leaders; Business Management programme trains young aspirants for the corporate world and in the fields of accounting, economics, finance management and marketing; programme outcomes of Sciences are to understand the world by building up conceptual models on the basis of experimentations and observations so as to enable addressing quality, quantity, fiscal sustainability and growth; the programme of Pharmacy is associated with providing an exhaustive pharmaceutical education to the students and to nurture the pharmacists to tackle the challenges and contribute efficaciously in the social healthcare system; the departments of Computer Application and Engineering initiate and reinforce the abilities to understand and implement the technological advancements for analysing and finding solutions to different problems; Legal Studies intend to build awareness around existing law and order at the social level and make students comprehend the legal terms and concepts so that they can apply the same as per necessity; Social Work department focuses on working for human rights, gender equality, economic justice and other ethical principles; Mass Communication and Journalism aim at creating analytical skills related to mass media and professionals in the area for demonstrating the knowledge of written, visual, multimedia and social media literacies in the 21st century mass media industries; the Hotel Management programme caters to the need of hospitality, utilize the right resources and empower students to use the knowledge of best practices for environmental, economic, cultural and social sustainability in the industry; the curriculum of English trains the students for an in-depth understanding of canonical works, for sound proficiency in English language, its technicalities and communication skills, and in the nuances of research; the programme of Fine Arts encourages the young artists to use their talent, imagination and skill to create works of art in core disciplines such as music, sculpture and painting among others.

All the programmes run by the university not only give exposure to the students to ample job opportunities, but also provides them with a lofty level of technical and managerial proficiency to analyze, design and propose a feasible solution to problems, to achieve excellence and to demonstrate exceptional leadership qualities. The curricula have groomed them to take part and excel in various national and international competitive, fellowship and scholarship examinations. The students have been integrally infused with necessary professional skills, core competency, effective oral and written communication skills, aptitude for insightful thinking, scientific temper, research skills, digital literacy, decision making ability, moral and ethical awareness. The curricula have facilitated them to work in intra and interdisciplinary enterprises for developing path-breaking ideas and products relevant to contemporary societal contexts. These programmes have equipped the students with adequate expertise and knowledge such that the latter can design, incorporate and activate policies oriented towards conquering challenges that hinder well-being of the global community through effective eco-amicable social service and consultancy delivery mechanisms.
