Ordinance & Syllabus

For

M.Sc. – MLT Academic Programme

Specialization/Discipline:

Medical Microbiology & Immunology

Ordinance According to NEP-2020

Duration: 2 years (4 Semesters)

Master of Science - Medical Laboratory Technology (M.Sc.-MLT)

1. M.Sc. MLT degree will be under the faculty of Medicine of C.S.J.M. University, Kanpur in the department of Medical Laboratory Technology.

2. Duration of Course:

- M.Sc. MLT course will be a full-time course.
- Duration will be two years (Four Semesters). This course shall be divided into four semester examinations namely MSc in Medical Laboratory Technology I & II Semester (First Academic Year), & III & IV Semester (Second Academic Year).

3. Specialization/Discipline

There shall be following specialization/discipline:

- M.Sc. MLT in Clinical Biochemistry
- M.Sc. MLT in Medical Microbiology & Immunology
- M.Sc. MLT in Pathology

4. Seats:

Specialization/ Discipline	No. of Seats
M.Sc. MLT in Clinical Biochemistry	10
M.Sc. MLT in Medical Microbiology & Immunology	10
M.Sc. MLT in Pathology	10

5. Admission: Eligibility:

The students who have passed B.Sc.-MLT (B.Sc.-Medical Laboratory Technology) Course from any recognized Institutions/University with minimum of 55% marks (50% for SC/ST)

Mode of Admission:

As per the University Norms.

6. Medium of Instruction

English shall be the medium of instruction for all the subjects of study and for examination of the course.

7. Method of Teaching:

The method of teaching adopted shall be a combination of lectures, demonstrations and practicals by the full time faculty, visiting or part time or guest faculty.

8. Examination:

As per the University norms.

Duration of examination:

As per the University norms.

9. Attendance to appear in the end semester examination :

The permission to appear in end semester examination shall be granted to such candidate only who have fulfill the condition of 75% attendance in each subject separately in theory and practical as per the university rule.

Regarding attendance requirements students will have to fulfill the condition of 75% attendance. 15% relaxation in attendance, in exceptional circumstances can be made by the Vice Chancellor on the recommendation of the Director/Coordinator/Head of the Institute/Department.

M.Sc. – Medical Laboratory Technology (MLT)

Medical Microbiology & Immunology

Program Outcome

At the end of the course the student should be able to:

- To provide medical laboratory services in all types of clinical laboratories from Primary healthcare laboratory to Tertiary health care institution in the fields of Bacteriology, Immunology, Mycology, Parasitology and Virology.
- Make specimen-oriented decision on predetermined criteria including working knowledge of critical values.
- Communicate with other members of healthcare team, customers and patients in an effective manner.
- Process information and ensure quality control as appropriate to routine laboratory.
- Train students in routine/special laboratory procedure.
- Upgrade knowledge and skills in a changing healthcare scenario.
- Should know the logical interpretation of clinical lab investigations.
- Should be capable to extrapolate data acquired
- Should be capable of supervise / guide the staff working on automated machine
- Should be capable of teaching, proposing/executing research project

Program Specific outcome

- Proficiently supervise and perform full range of clinical laboratory investigations related to Medical Microbiology, hence provide medical laboratory services in all types of clinical laboratories from Primary healthcare laboratory to Tertiary health care institution in the fields of Bacteriology, Immunology, Mycology, Parasitology and Virology.
- Develop and evaluate test systems and interpretive algorithms.
- Manage information to enable effective, timely, accurate, and cost-effective reporting of laboratory-generated information.
- To teach under graduate students and develop/guide research projects.
- Faculty development in Medical Laboratory Technology (MLT).

"B" Regulations : Scheme of Examination

M.Sc.-MLT (Medical Microbiology & Immunology)

First Semester University Examination

3.	Dissertation	MMLT-403MI							300
							Gran	d Total	700

SCHEME OF EXAMINATION

Internal Assessment

- It will be for theory and practical both.
- It will be done through the whole semester
- Candidate must obtain at least 40% marks in theory and practicals separately in internal assessment to be eligible for the semester university examination.

• a)	Internal assessment (Theory) will be done as follows: Seminars/Symposia/Journal club/Assignment/	
- ,	Clinical presentation	= 10 marks
b)	Mid-term examination	= 10 marks
c)	Attendance/Teaching Skills	= 05 marks
		Total = 25 marks
● a) b) c)	Internal assessment (Practical) will be done as follows: Lab work Presentation /Clinical Lab Practices/Clinical Training Practical Training Skills/ Continuous evaluation Laboratory Manual/Attendance	= 10 marks = 10 marks = 05 marks Total = 25 marks
● a) b)	Internal assessment of subjects without practical will be done as: Assignments/ Projects/ class test/ Presentations Mid Term examination	= 10 marks = 10 marks
c)́	Attendance/Teaching Skills	= 05 marks Total = 25 marks

Criteria for Passing

• As per University norms.

Maximum duration for completion for course

• A candidate shall complete the course within four years from date of admission failing which the candidate will be discharged.

Division:

• As per the University norms.

Degree:

• The degree of M.Sc.-MLT course of the University shall be conferred according to specialization/discipline on the candidates who have pursued the prescribed course of study for not less than two academic years and have passed examinations as prescribed under the relevant scheme.

Monitoring Progress of Studies

It is essential to monitor the learning progress of each candidate through continuous appraisal and regular internal assessment. It not only also helps teachers to evaluate students, but also students to evaluate themselves. The monitoring be done by the faculty members of the department based on participation of students in various teaching / learning activities.

(a) Seminar

- Seminars /recent advance presentation will be held every week, however, its timings are subject to clinical schedule. Topics must be well researched and must include common knowledge, recent advances, analysis and references.
- PG students should present minimum of two seminars in a semester (One in general and one in elective area) and Internal Assessment marks will depend on better topic selection and presentation.

(b) Clinical Lab Practices

Post graduate students must do:

- Sample collection, storages & analysis of every sample given to them for various parameters.
- They should know proper laboratory management.
- They should work on every instrument according to their specialization.
- Maintenance and care of the instrument of the laboratory.
- They will do hospital/laboratory/blood bank postings for training & skill development.

(c) Teaching Skills

Candidates should be encouraged to teach undergraduate students if any. This performance will be based on assessment by the faculty members of the department and from feedback from the undergraduate students.

(d) Journal Review Meeting (Journal Club):

The ability to do literature search, in depth study, presentation skills, and use of audio- visual aids are to be assessed. The assessment is made by faculty members and peers attending the meeting.

(e) Work diary / Log Book

Every student shall maintain a work diary and record his/her participation in the training programmes conducted by the department such as journal reviews, seminars, etc. Special mention may be made of the presentations by the candidate as well as details of clinical practice, if any conducted by the student.

(f) Mid Term Examination/Class Test/Assignments

There will be mid-term examination/class tests/ assignments in every semester. Various class test may be taken by the department and assignments may be given to students on various topics. Marks of these will be included in every semester.

(g) Records

Records, log books and marks obtained in mid-term examination/class tests/ assignments will be maintained by the Head of the Department/Teacher of the concerned subject.

Dissertation

Every candidate pursing M.Sc.-MLT degree course is required to carry out research work on a selected research project under the guidance of a recognized postgraduate teacher. The results of such a work shall be submitted in the form of dissertation. Topic for dissertation shall be assigned by the guide.

If the subject of Thesis entails collaboration with other departments or specialties, the collaborative portion of the work will be supervised by Co-Guide, designated by the University Institute of Health Sciences in consultation with the Guide. Where a Co-Guide is involved, the Thesis will be certified jointly by the Guide & Co-guide.

Every candidate shall submit synopsis to the University in the prescribed Performa containing particulars of proposed dissertation work, within 6 months from the date of commencement of the course on or before the dates notified by the university. The synopsis shall be sent through the proper channel. Such synopsis will be reviewed and the university will register the dissertation topic.

No change in the dissertation topic or guide shall be made without prior approval of the university. Guide will be only a facilitator, advisor of the concept and hold responsible in correctly directing the candidate in the methodology and not responsible for the outcome and results.

The dissertation should be written under the following headings.

- 1. Introduction
- 2. Aims or objectives of study
- 3. Review of literature
- 4. Material and methods
- 5. Results
- 6. Discussion
- 7. Conclusion
- 8. References
- 9. Master and Chart & Table (If Applicable)
- 10. Annexure (If Applicable)

The written text of dissertation/ research project shall not be less than 50 pages and shall not exceed 125 pages excluding references, tables, questionnaires and other annexure. It should be neatly typed in double line spacing on one side of bond paper (A4 size, 8.27" x 11.69") and bound properly. Spiral binding should be avoided. A declaration by the candidate for having done the work himself should also be included, and the guide, head of the department and Director/Coordinator of the institute shall certify the dissertation/ research project.

Every candidate is required to give power point presentation before final submission of dissertation. Four copies of Dissertation/research project shall be submitted to the university, through proper channel, along with a soft copy (CD), 2 months before the final examination. It shall be assessed by two examiners appointed by the university, one internal and one external. There will be a power point open presentation of the submitted dissertation as per the schedule given by the university. This presentation shall be jointly evaluated by external and internal examiner as per the criteria given below:

Total	300 Marks
Conclusion & outcome	50 Marks
Result and Discussion	100 Marks
Methodology adopted	100 Marks
Objective(s) of the work done	50 Marks

To pass in the dissertation a student must secure 150 marks.

If the student failed to secure the minimum passing marks he will resubmit the dissertation 1½ month before the supplementary exam.

Guide

I. Eligibility to be a guide

- (a) Full time faculty involved in teaching in the same department/institute or in the colleges or institution where he or she is working.
- (b) Academic qualification and teaching/professional experience for each branch

• For M.Sc.-MLT in Medical Microbiology & Immunology

MBBS, MD (Medical Microbiology)/M.B.B.S, M.Sc.-in Medical Microbiology with 02 years teaching/professional experience.

Or

MBBS, Ph.D. (Faculty of Medicine) with 02 years teaching/professional experience in related subject.

Or

MBBS with 5 years teaching experience in related subject.

Or

MBBS/Ph.D.(Life Science) with 5 years teaching experience in related subject. Or

M.Sc. (Medical Microbiology) or M.Sc.-MLT in Microbiology and Immunology/related subject with 5 years teaching experience after the post graduate qualification in teaching institute.

The Vice Chancellor of the University can appoint a person as a guide whom he/she considers suitable.

II. Age of Guide

The age of guide should not exceed 62 years or as per university norms.

III. Guide student ratio

1: 5

A recognized guide shall supervise dissertation work of not more than 5 students per academic year.

IV. Change of Guide

In the event of registered guide leaving the department/institute or in the event of death of guide, guide may be change with prior permission from the university.

* Not Included in University Exam.

Syllabus

M.Sc.-MLT – Semester-I for all Specialization

MEDICAL BIOCHEMISTRY

Subject Code: MMLT-101MI

Theory- Min. Hrs -: 60 Hrs., Practical- Min. Hrs -: 60 Hrs.,

Course Outcomes

- To provide brief knowledge of biochemical metabolites.
- To impart knowledge about methods of qualitative and quantitative analysis of biomolecules.

THEORY

1. Carbohydrates

- Definition, Function, Classification, Isomerism & Properties of Monosaccharides, Disaccharides Polysaccharides
- Metabolism-Utilization of Glucose, Glycogenesis (in brief), Glycogenolysis (in brief), Glycolysis, Citric Acid Cycle, Gluconeogenesis(in brief), HMP Shunt(in brief), Regulation of Blood Glucose level

2.-Amino Acids

- Definition, Classification & functions
- Properties

3.- Proteins-

- Definition, classification, functions
- Structural Organization-Primary, Secondary, Tertiary & Quaternary
- Metabolism- Catabolism of Amino Acid Nitrogen, Synthesis of Urea- Transamination, Oxidative deamination, Ammonia formation & Transport, Urea Cycle, Metabolic Disorders in Urea Cycle,
- Essential and non-essential amino acids
- Creatine & Creatinine, Proteinuria

4.-Lipids

- Definition, classification, biomedical importance, Lipoproteins in the blood composition & their functions in brief,
- Metabolism- Beta oxidation of fatty acids, fatty liver, Ketosis, Cholesterol & it's clinical significance. Atherosclerosis. essential fatty acids

5.- Enzymes

• Introduction, definition, classification, coenzymes, isoenzymes, properties, factors affecting enzyme action, enzyme inhibition, diagnostic value of serum enzymes,

6- Hyperglycemia & hypoglycemia -

- Hyperglycemia, Diabetes mellitus definition, types, features, gestation diabetes mellitus, glucose tolerance test, Glycosylated hemoglobin, glycosurias,
- Glucose Tolerance test, Insulin Tolerance Test Hypoglycemia & its causes

7- Bilirubin General types and Jaundice

- Liver Function Test
 - i) Bilirubin estimation
 - ii) Alkaline phosphates and acid phosphates estimation
 - iii) SGOT, SGPT Estimation
- 8- Xylose absorption test
- 9- Analysis of calculi

11-Cerebrospinal fluid analysis

Composition and function of CSF

- Clinical significance of CSF analysis
- Estimation of sugar and proteins in CSF

10- Urine chemistry

- Physical and Chemical examination of Urine samples. Qualitative tests for inorganic urinary ingredients
- Common qualitative and quantitative tests of urine
- Automation in Urine chemistry
- 11- Renal Function tests-

Functions of Kidney

GFR

Various Renal Function tests

- 12- Blood gases and pH, carboxyhemoglobin, CO, Met Hb, O₂ saturation
- 13- Blood collection procedures- theory of anticoagulation.
- 14- Bio-Medical waste: Types, potential risks and their safe management.

PRACTICAL

- 1- Identification of Carbohydrates (qualitative tests).
- 3- Identification of Proteins (qualitative tests).
- 4- To study general properties of the enzyme (Urease) & Achromatic time of Salivary amylase.
- 5- Urine analysis –abnormal constituents of urine.
- 6- Biochemical examination of CSF.
- 7- Estimation of blood sugar by Folin wu method & Glucose Oxidase Method
- 8- Estimation of blood urea.
- 9- Estimation of blood uric acid.
- 10- Estimation of serum creatinine
- 11- Estimation of total serum protein
- 12- Estimation of Cholesterol/HDL/LDL Cholesterol by enzymatic method.
- 13- Estimation of Serum Triglyceride
- 14- Estimation of Serum Bilirubin- total & direct
- 15- Estimation of Alkaline & Acid Phosphatase
- 16- Estimation of SGOT, SGPT, GGTP
- 17- Estimation of serum total protein
- 18- Estimation of serum Globulin
- 19- Estimation of serum Albumin
- 20- Estimation of Serum Amylase
- 21- Estimation of common parameters in urine through use of strips.

M.Sc.-MLT –Semester-I for all Specialization

CLINICAL PATHOLOGY & IMMUNOPATHOLOGY

Subject Code: MMLT-102MI

Theory- Min. Hrs -: 60 Hrs., Practical- Min. Hrs -: 60 Hrs.,

Course Outcomes

- To provide complete knowledge of collection, transportation and processing of various clinical pathology specimens.
- To provide complete knowledge of investigative & diagnostic procedure involved in clinical pathology.
- To provide brief knowledge of immunohematological diseases.

THEORY

A. CLINICAL PATHOLOGY

- 1. Collection, transport, preservation and processing of various clinical specimens
- 2. Urine examination- microscopic.
- 3. Test for haemosiderin pigment.
- 4. Stool examination
 - Collection of specimen of feaces
 - Macroscopic (Naked eye) inspection
 - Concentration method, Flotation method.
 - Microscopic examination
 - Chemical examination
 - Strip method
 - Test for Occult blood Benzidine Test
- 6. Sputum examination
 - collection of specimen
 - Physical examination
 - Microscopic Gram's stain, Ziehl Neelsen stain for AFB
 - Chemical examination
- 7. Gastric analysis

Indications, contra indications. Method of collection. Fasting gastric juice – Macroscopic and microscopic examination.

- Fractional test meal
- Augmented Histamine test
- Hollander's test
- 8. Cerebrospinal fluid analysis

Method of obtaining CSF, indications, contra indications.

Examination of CSF:

- Physical examination
- Biochemical examination
- Microscopic examination
 - a. Cytological examination
 - b. Bacteriological examination
- 9- Semen Analysis- Gross & Microscopic
- 9. Body fluids

Microscopic examination of Pleural, Pericardial, synovial, ascitic and peritonial fluid. 10. Pregnancy Test- Method, interpretation.

B. IMMUNOPATHOLOGY

1. Mechanism of Ab-mediated inactivation: direct and indirect

e.g. Diabetes mellitus, Thyroid diseases, Pernicious anemia, Polyendocrinopathy, Infertility, Haemophilia, Myasthenia gravis, Anti-idiotypes and diseases.

- 2. Immune deficiency disorders
- Immunohaematologic diseases: Transfusion reactions, erythroblastosis foetails, warm-antibody diseases, cold antibody diseases, drug and hemolytic diseases, agranulocytosis, thrombocytopenic purpura, immune suppression cytotoxic antibodies in vitro.
- 4. Immune complex reactions: arthus reaction, serum sickness, evaluation of circulating immune complexes.
- 5. Connective tissue diseases: Arteritis, SLE, Dermatomyosis, Rheumatic fever, Rhematoid arthritis, Progressive systemic sclerosis.
- 6. Atopic anaphyllactic reactions: reaginic antibody, anaphylaxis, atopic allery factors involved, asthma, hay fever, food allergy, insect allergy, atopic eczma, delayed hypersensitivity reactions, contact dematitis, viral infections, graft rejection.
- 7. Autoallergic diseases: encephalomyelitis, multiple sclerosis, orchitis, thyroiditis, sjogren's syndrome.
- 8. Granulomatous reactions: Infectious diseases like Tuberculosis, Leprosy.
- 9. Immunomodulators
- 10. Autoimmune diseases
- 11. Immunology of AIDS.

PRACTICAL

A. Clinical Pathology

- 1.Urine examination microscopic.
- Urine Test for haemosiderin pigment.
- 2. Stool examination
 - i. Macroscopic examination
 - ii. Concentration method, Flotation method.
 - iii. Microscopic examination
 - iv. Benzidine Test- for occult blood
- 3. Sputum examination Macroscopic, Microscopic and AFB Staining
- 4. Examination of Cerebrospinal fluid (CSF) and body fluids.
- 5. Pregnancy Test
- 6. Examination of Semen-Microscopic.

B. Immunopathology

- 1. Serological tests (Screening & diagnostic) used in different pathological conditions.
- 2. Delayed type hypersensitivity testing.
- 3. Histocompatibility testing
- 4. Coomb's test Direct & Indirect
- 5. Setting up of Immuno histochemistry lab.
- 6. Other tests

M.Sc.-MLT –Semester-I for all Specialization

GENERAL MICROBIOLOGY Subject Code: MMLT-103MI Theory- Min. Hrs -: 60 Hrs., Practical- Min. Hrs -: 60 Hrs.,

Course Outcomes

- To provide supportive clinical care and uses of relative investigations.
- To identify the indictors of basic procedures and perform them in appropriate manner.

THEORY

(A) General Microbiology

- Classification of microorganism Prokaryotes and Eukaryotes
- Microscope Light/Dark field microscope/ phase contrast /fluorescence/Electron
- Staining Methods: Sample, Stain, Negative staining, Gram's Stain, principle, Modification of Gram's Staining. Acid fast stain, Modifications, Interpretation, About Stain.
- Morphology of Bacteria Shape, Cell wall, Gram positive cell wall, Gram negative cell wall, Cell membrane. Cytoplasm, Cell wall, Appendages – Capsule, Flagella, Fimbriae/pilli.
- Bacterial spore
- Bacterial growth and nutrition- Growth requirement, sources, environmental factors affecting growth.
- Bacterial count
- Bacterial growth curve, Lag phage, log phase, stationary factors, affecting growth of bacteria oxygen carbon dioxide, temperature, pH, Light, Osmotic effect.

(B) Sterilization and disinfection: Physical agents – drying heat, dry heat, flaming, incineration, moist heat, filtration, radiation, ionizing radiation, non-ionizing radiation.

Chemical agents of sterilization – Alcohol, Aldehydes. Phenols, halogens, Iodine, Chlorine, Oxidizing, agents, heavy metals, surface active agents. Cationic, Anionic. Dyes – Aniline, Phenol, Coefficient (Rideal Walker Test).

(C) Culture media and Methods

Constituents of culture media, meat extract, yeast extract. Agar types of culture Media-Liquids Semi solid, solid, Peptone water, nutrient, broth, nutrient, Agar basal media, Enriched media, Blood Agar, Chocolate Agar Loffler's serum slop, Blood Culture Media.

Enrichment broth selective media, transport media, differential media, Mackonkey Agar, CLED Agar, Anaerobic culture method.

Culture Method : Streak culture, Lawn or carpet culture, Stroke culture, Stab culture, liquid culture, pour plate culture.

Anaerobic culture methods : Anoxomat, McIntosh & fild's Anaerobic Jar, Gaspak system

D) General Principles in Microbiology

- 1. Collection and handling of various samples.
- 2. Antimicrobial sensitivity and assay.
- 3. Lab animals handling and care
- 4. Laboratory Safety

PRACTICAL

- Culture medias preparation and composition -Nutrient Agar, Mackonkey, Cled, Sabaurauds etc.
- Gram's staining of different specimens like pus, sputum, urine, CSF, endometrial tissue, pleural fluid
- AFB staining of different specimens like sputum, pus, pleural fluid, endometrial tissue.
- Antibiotic sensitivity testing
- Identification of various bacteria on various culture medias.

M.Sc.-MLT –Semester-I for all Specialization

RESEARCH METHODOLOGY

Subject Code: MMLT-104MI Theory- Min. Hrs -: 80 Hrs.

Course Outcomes

- Understand the basic principles of research and methods applied to draw inferences from the research findings.
- To be made aware of the need of biostatistics and understanding of data and sampling methods in labs.

THEORY

Research Methodology

1. Research in Medical Laboratory Technology

- Introduction
- Research for Laboratory Technician: Why? How? And When?
- Research Definition, concept, purpose, approaches
- Internet sites

2. Research Fundamentals

- Define measurement
- Measurement framework
- Scales of measurement
- Pilot Study
- Types of variables
- Reliability & Validity
- Drawing Tables, graphs, master chart etc

3. Writing a Research Proposal, Critiquing a research article

- Defining a problem
- Review of Literature
- Formulating a question, Operational Definition
- Inclusion & Exclusion criteria
- Forming groups
- Data collection & analysis
- Results, Interpretation, conclusion, discussion
- Informed Consent
- Limitations

4. Research Design

- Principle of Designing
- Design, instrumentation & analysis for qualitative research
- Design, instrumentation & analysis for quantitative research
- Design, instrumentation & analysis for quasi-experimental research
- Design models utilized

5. Research Ethics

- Importance of Ethics in Research
- Main ethical issues in human subjects' research
- Main ethical principles that govern research with human subjects
- Components of an ethically valid informed consent for research

Textbooks:

1. B.L Agarwal, (2012), Basic statistics, New Age International Publication.

Reference:

- 1. Sundarrao, (2002), Introduction to biostatistics and Research Methodology, 1st Ed. CBS.
- 2. C.R Kothari, (2014) Research methodology, 3rd Ed., New Age international publication.

M.Sc.-MLT –Semester-I for all Specialization

DISSERTATION

Min. Hrs -: 40 Hrs.

Students will prepare their synopsis for dissertation in consultation with their guides.

Performa for synopsis:

- 1. Introduction
- 2. Aims and Objectives
- 3. Review of Literature
- 4. Methodology or Material and Methods
- 5. References

Note:

- 1. The copies of synopsis must be in bound properly.
- 2. The candidate have to submit 4 copies of synopsis.
- 3. Colour scheme for synopsis will be white.

4. Text writing Paper to be used – A4 size (Bond Paper) Printing – One side Font - Title – 18 Pt. Bold Heading – 16 Pt. Bold. Sub Heading – 14 Pt. Bold Running text (English) -12 Pt. – Times New Roman Running Text (Hindi) 14 Pt. (CG12, Krutidev 10) Spacing : Double Margin : Left – 4 Cm, Top, Bottom, Right – 2.5 Cm. Page Numbering– Properly numbered

5. Writing Reference

Should be numbered consecutively in the order in which they are first mentioned in the text (not in alphabetic order). Identify references in text, tables and legends by Arabic numerals in superscript. References cited only in tables or figure legends should be numbered in accordance with the sequence established by the first identification in the text of the particular table or figure.

Journal Articles

Shashi A, Jain SK and Pandey M: *In-vitro* evaluation of antilthiatic activity of seeds of *Dolichos biflorus* and roots of *Asparagus racemosus*. International Journal of Plant Sciences 2008; 1:67-71.

A Book

Kalia AN: A Text Book of Industrial Pharmacognosy. CBS Publishers & Distributors, First Edition 2005.

A Chapter in a Book

Nadkarni KM: Indian Materia Medica. Popular Prakashan, Mumbai, Edition 3, Vol. I, 2000: 242-246.

M.Sc.-MLT – Semester-I for all Specialization

TEACHING SKILLS/SEMINARS/ SEMINARS/ SYMPOSIA/ JOURNAL CLUB ETC. Min. Hrs -: 80 Hrs.

(a) Teaching Skills

Candidates should be encouraged to teach undergraduate students if any. This performance will be based on assessment by the faculty members of the department and from feedback from the undergraduate students.

(b) Seminar

- Seminars /recent advance presentation will be held every week, however, its timings are subject to clinical schedule. Topics must be well researched and must include common knowledge, recent advances, analysis and references.
- PG students should present minimum of two seminars (One in general and one in elective area) and Internal Assessment marks will depend on better topic selection and presentation.

(c) Journal Review Meeting (Journal Club):

The ability to do literature search, in depth study, presentation skills, and use of audio- visual aids are to be assessed. The assessment is made by faculty members and peers attending the meeting.

(d) Work diary / Log Book

Every student shall maintain a work diary and record his/her participation in the training programmes conducted by the department such as journal reviews, seminars, etc. Special mention may be made of the presentations by the candidate as well as details of clinical practice, if any conducted the student.

M.Sc.-MLT – Semester-II for all Specialization

MEDICAL LABORATORY MANAGEMENT Subject Code: MMLT-201MI

Theory- Min. Hrs -: 60 Hrs., Practical- Min. Hrs -: 60 Hrs.,

Course Outcomes

- To be made aware of basic ethics, good lab practices including awareness/safety in a clinical laboratory.
- To understand sample accountability, quality management system, biomedical waste management.
- To know calibration and validation of clinical laboratory instruments, laboratory information system (LIS), Hospital information system (HIS) and financial management.

THEORY

1. Preparation of operating budgets

General aspects of financial management of laboratories

2. Cost-analysis (tests and instruments); justification of providing new services or rejecting existing ones; lease and purchase decision analysis; delegation of budget responsibilities, work load statistics. 3. Laboratory design

Designing laboratories for different types and sizes of institutions: selection of equipment and systems for the laboratory, concepts of workstation consolidation, workflow analysis, concepts in laboratory automation (sample transportation systems, modular systems, robotics).

4. Laboratory safety

Fire, chemical, radiation and infection control

(Body substance precautions), hazardous waste and transport of hazardous materials.

5. Training of technical staff

Familiarity is needed with the syllabi of various training programs; knowledge of the teaching requirements and level of knowledge technical staff; understanding of qualifications of technologists trained in other countries.

6. Maintenance of records

Procedure manuals, ward manuals, guality control programs, patient data retrieval.

7. Personnel management

Personnel policy manual; job descriptions; labor, supervision relations; conducting job interviews; motivation, recognizing job distress syndrome; delegation to a laboratory manager.

8. Hospital organization

Interactions between the laboratory service and the rest of the hospital.

9. Professional ethics.

10. Quality assurance;

Total quality management; development and monitoring of performance indicators.

11. Public relations:

hospital and community.

12. Basic clinical epidemiology

13. Laboratory Data Processing

14. General principles of methods for reduction of data into forms suitable for electronic data handling systems (computerized accessioning functions, sample identification and tracking (e.g. bar code systems), result reporting, storage and retrieval, electronic data transfer).

15. Use of computers in quality control and management

Use of computers for calculating analytical results (eg. non-linear functions).

16. General aspects of system design

Central vs. stand-alone systems, host computers and equipment interfaces.

17. Laboratory information systems (LIS), Hospital information systems (HIS).

18. Personal computer use

Word processing, spreadsheets, data-base, graphics, statistics, presentations, email, internet. Security of data storage and transmission.

19. Data base structures and data mining.

20. Appropriate access control to patient information.

PRACTICAL

- Sample accountability-
 - Labeling of sample
 - Making entries in Laboratory records
- Reporting results-

_

- Basic format of a test report
- Release of examination results
- Alteration in reports
- Calibration and Validation of Clinical Laboratory instruments
- Ethics in medical laboratory practice in relation to the following:
 - Pre-Examination procedures
 - Examination procedures
 - Reporting of results
 - Preserving medical records
- Access to medical laboratory records 8. Audit in a Medical Laboratory Documentation

Text Books

- 1. Godkar.B. Praful,(2016) Textbook of MLT,3rd edition,Bhalani Publications
- 2. Sood Ramnik,(2015), Text book of Medical Laboratory Technology,2nd edition, Jaypee Publications <u>Reference Books</u>

- 2. Bishop (2013), Clinical Chemistry, 7th edition, Wiley Publications.
- 3. Henry's Clinical Diagnosis and Management by Laboratory Methods, (2011), 22nd edition, Elsevier.

M.Sc.-MLT –Semester-II for all Specialization

BLOOD GROUPING & IMMUNOLOGY Subject Code: MMLT-202MI Theory- Min. Hrs -: 60 Hrs., Practical- Min. Hrs -: 60 Hrs.,

Course Outcomes

- This syllabus provide knowledge about Blood grouping and cross matching.
- Students will be able to perform blood group testing and cross matching.
- To make aware of basic aspects of immunity, antigens, antibodies.
- To make use of immunological diagnosis in patient disease finding.

THEORY

BLOOD GROUPING

Introduction, Human Blood Group system, ABO Subgroups, Red Cell Antigen, Natural Antibodies, Rh System, Rh Antigens & Rh Antibodies, Hemolytic Disease of Newborn & Prevention, Principal of Blood grouping, antigen-antibody reaction, Agglutination, Haemagglutination, Condition required for antigen antibody reaction, Blood grouping techniques, Cell grouping, Serum grouping, Methods for ABO grouping. Slide & Tube Method, Cell grouping, Serum grouping, Rh grouping by slide & tube method, Difficulties in ABO grouping, Rouleaux formation, how it interferes with Blood grouping, Auto agglutinins, Antiserum used in ABO test procedures, Anti –A, Anti-B Anti- AB Antiserum, Inheritance of the Blood groups, Control, A&B Cells preparation, Auto control, Medical applications of Blood groups.

CROSS MATCHING

Purpose

Major and Minor cross matching

Different types of Major & Minor tests

Difficulties in cross matching

Immunity-Innate Immunity, Acquired Immunity and Miscellaneous Immunity-Concepts of specificity and memory, Basic properties of innate immune cells, Basic properties of adaptive immune cells.

Physiochemical properties of innate immunity-Physiological barriers, Anatomical barriers, Phagocytic/endocytic barriers, Inflammatory barriers, Immune Response -Humoral & Cell mediated.

Antigens and Immunogens - Complete antigens, Heptane, Factors affecting antigens, Classes of antigens, Immunoglobulins (Igs), Types of Immunoglobulins, Properties of Immunoglobulins, Abnormal Immunoglobulins, Monoclonal antibodies

Antigen/Antibody reactions-Precipitation, Agglutination, Compliment fixation test, Neutralization test, Immunofluorescence, Radioimmuno assay, ELISA, Rapid tests, Chemiluminisence linked Immunoassay, Immuno electron microscopy, Immunoblotting, Applications of antigens/antibody reactions.

Compliment system pathway

Immunological mechanism in health system - Lymphoid system, MHC Complex

PRACTICAL

- 1. Blood grouping.
- 2. Rh grouping & Rh typing (slide & tube method)
 - Du Testing
 - Rh antibody titration
- 3. Compatibility Testing
 - Selection of blood
 - Crossmatching Technique Major, Minor, Saline, Albumin, Coomb's, Emergency and Special conditions.
- 4. Rapid plasma Reagin Tests
- 5. Rheumatoid arthritis factors
- 6. C reactive protein test
- 7. ELISA
- 8. Antistreptolysin-O

Text Books

- 1. Godkar.B. Praful, (2016) Textbook of MLT,3rd edition, Bhalani Publications.
- 2. Sood Ramnik, (2015), Text book of Medical Laboratory Technology,2nd edition, Jaypee Publications.

- 6. Delves P, Martin S, Burton D, Roitt IM. (2006). Roitt's Essential Immunology.11th edition Wiley-Blackwell Scientific Publication, Oxford.
- 7. Goldsby RA, Kindt TJ, Osborne BA. (2007). Kuby's Immunology. 6th edition W.H. Freeman and Company, New York.

M.Sc.-MLT – Semester-II for all Specialization

BIOMEDICAL TECHNIQUES Subject Code: MMLT-203MI Theory- Min. Hrs -: 60 Hrs., Practical- 60 Hrs

Course Outcome

To make aware of different biomedical techniques and their uses.

THEORY

- Methods of qualitative analysis of biomolecules: Principles, experimental procedures and application of chromatography – paper, thin-layer, ion exchange, affinity, gel filtration, gas-liquid and HPLC. Principles, procedures and application of Electrophoresis – paper, polyacrylamide gel, agarose gel, capillary and cellulose acetate.
- 2. Quantitative methods:

Principles and applications of Photometry, Spectrophotometry, flurometry, ion selective procedures, flame photometry, atomic absorption spectrometry. Ion selective electrodes and their applications in Medicine.

- Centrifugation Techniques Principle and technique of preparative and analytical centrifugation, differential centrifugation, density gradient centrifugation, ultra-centrifuge and its application.
- Radio Isotopes: Detection and measurement of radioactive isotopes, application of isotopes in research and clinical bio-cemsitry, Radioactive emissions, radiation-matter interaction, radiation dose.
- 5. Cell Fractionation, Biochemical activities of different fractions, marker enzymes.
- Bioenergetics and Biological oxidation: Concept of free energy change, high energy compounds, ATP generation, redox Potential Assessment, Electron transport chain, oxidative phosphorylation, inhibitors, Uncouplers, ionophores.
- 7. Purification of enzymes from cells, characterization and Internal Assessment of purity, purification of proteins.

PRACTICAL

- 1. Chromatography: paper, thin layer, gel, ion-exchange, demonstration of HPLC and GLC
- 2. Photometry, spectrophotometry, atomic absorption spectrophotometry
- 3. Electrophoresis: slide gel, PAGE, Agarose gel, Native, SDS PAGE of Blood Sample. (Demo only)
- 4. Cell fractionation methods
- 5. Estimation of Inorganic phosphorous
- 6. Estimation of Serum Calcium
- 7. Estimation of LDH
- 8. Estimation of CK Nac
- 9. Estimation of CK MB
- 10. Estimation of Sodium
- 11. Estimation of Potassium
- 12. Estimation of Phosphorus
- 13. Estimation of TIBC
- 14. Estimation of Hemoglobin
- 15. Other tests

Text Books

- 1. Godkar. B. Praful,(2016) Textbook of MLT,3rd edition,Bhalani Publications.
- 2. Sood Ramnik,(2015), Text book of Medical Laboratory Technology,2nd edition, Jaypee Publications.

Reference Books

- 1. Teitz,(2007),Fundamentals of Clinical Chemistry,6th edition, Elsevier Publications.
- 2. Henry's Clinical Diagnosis and Management by Laboratory Methods,(2011), 22nd edition, Elsevier.
- 3. Singh & Sahni,(2008), Introductory Practical Biochemistry,2nd edition, Alpha science.
- 4. Lehninger, (2013), Principles of Biochemistry, 6th edition, W H Freeman.
- 5. Wilson & Walker, Practical Biochemistry, 2nd edition.

M.Sc.-MLT –Semester-II for all Specialization

BIOSTATISTICS Subject Code: MMLT-204MI Theory- Min. Hrs -: 80 Hrs.

Course Outcomes

- To know the basic knowledge of Biostatistics and their use in data analysis.
- To evaluate patient data.

THEORY

1. Biostatistics

- Introduction
- Definition
- Types
- Application

2. Data

- Definition
- Types
- Presentation
- Collection methods

3. Measures of central value

- Arithmetic mean, median, mode. Relationship between them
- Partitioned values- Quatertiles, Deciles, Percentiles
- Graphical determination
- 4. Measures of Dispersion
 - Range
 - Mean Deviation
 - Standard Deviation

5. Normal Distribution Curve

- Properties of normal distribution
- Standard normal distribution
- Transformation of normal random variables.
- Inverse transformation
- Normal approximation of Bioaxial distribution.

6. Correlation analysis

- Bivariate distribution:
- Scatter Diagram
- Coefficient of correlation
- Calculation & interpretation of correlational coefficient
- T-test, Z-test, P-value

7. Regression analysis

- Lines of regression
- Calculation of Regression coefficient
- Sampling distribution
- Standard error
- Types I & II error

9. Probability (in Brief)

- 10. Hypothesis Testing
 - Null Hypothesis
 - Alternative hypothesis
 - Acceptance & rejection of null Hypothesis
 - Level of significance

11. Parametric & non parametric tests

- Chi square test
- Mann-Whitney U test
- Wilcoxon Signed test
- Kruskal-Wallis test
- Friednam test
- T-test/student T test
- Analysis of variance

Textbooks: 1. B.L Agarwal, (2012), Basic statistics, New Age International Publication.

- <u>Reference:</u>
 1. Sundarrao, (2002), Introduction to biostatistics and Research Methodology, 1st Ed. CBS.
 2. C.R Kothari, (2014) Research methodology, 3rd Ed., New Age international publication.

M.Sc.-MLT –Semester-II for all Specialization

DISSERTATION

Min. Hrs -: 40 Hrs.

Students will do the research work for their dissertation as per the synopsis.

TEACHING SKILLS/SEMINARS / SYMPOSIA/ JOURNAL CLUB ETC. Min. Hrs -: 80 Hrs.

(a) Teaching Skills

Candidates should be encouraged to teach undergraduate students if any. This performance will be based on assessment by the faculty members of the department and from feedback from the undergraduate students.

(b) Seminar

- Seminars /recent advance presentation will be held every week, however, its timings are subject to clinical schedule. Topics must be well researched and must include common knowledge, recent advances, analysis and references.
- PG students should present minimum of two seminars (One in general and one in elective area) and Internal Assessment marks will depend on better topic selection and presentation.

(c) Journal Review Meeting (Journal Club):

The ability to do literature search, in depth study, presentation skills, and use of audio- visual aids are to be assessed. The assessment is made by faculty members and peers attending the meeting.

(d) Work diary / Log Book

Every student shall maintain a work diary and record his/her participation in the training programmes conducted by the department such as journal reviews, seminars, etc. Special mention may be made of the presentations by the candidate as well as details of clinical practice, if any conducted by the candidate by the student.

M.Sc.-MLT –Semester-II for all Specialization

CLINICAL LAB PRACTICES OR CLINICAL TRAINING*

Min. Hrs -: 120 Hrs.

Clinical Lab Practices

Post graduate students must do:

- Sample collection, storages & analysis of every sample given to them for various parameters.
- They should know proper laboratory management.
- They should work on every instrument according to their specialization.
- Maintenance and care of the instrument of the laboratory.
- They will do hospital/laboratory/blood bank postings for training & skill development.

OR

Clinical Training

The students will get their clinical training in a medical college / 100 bedded hospital with well-equipped Pathology/ Clinical Biochemistry/ Medical Microbiology Laboratory.

M.Sc.-MLT (Medical Microbiology & Immunology) Semester-III

SYSTEMIC BACTERIOLOGY Subject Code : MMLT-301MI

Theory- Min. Hrs -: 80 Hrs., Practical- Min. Hrs -: 80 Hrs.

Course Outcomes

- To understand different types of bacterial culture procedure.
- To understand the staining procedure and various test to identify the bacteria.
- To understand the morphology, cultural characteristics and lab diagnosis of various bacteria.

THEORY

Gram-positive cocci :- Staphylococcus, Streptococcus, Pneumococcus,

Gram-negative cocci:- Neisseria Gonorrhea and Neisseria Meningitidis

Gram-positive bacilli:- Cornybacterium diphtheria, Clostridium Tetanae Clostridium Bottalenum, Mycobacterium tuberculosis, Mycobacterium Leprae, Bacillus

Gram-negative bacilli:- Enterobacteriaceae- E.coli, Klebsiella, Proteus, Salmonella, Helicobacter. Pylori, Shigella

Miscellaneous Bacteria:- Spirocheates, Mycoplasma, Chlamydia

PRACTICAL

Isolation, characterization, and identification of pathogens from various clinical specimens.

- 1. Study of morphology, culture, and biochemical characteristics of common bacterial pathogens
- 2. Study of antibiotic sensitivity of common pathogens.
- 3. Leprae bacilli staining, modified AFB staining
- 4. Staining for mycobacterium tuberculosis, AFB staining
- 5. Antibiotic sensitivity testing
- 6. Sputum culture, Urine culture,
- 7. Pus culture
- 8. Colony characteristics of various bacteria on various media
- 9. Smear preparation from various clinical specimen and staining

Text Books

- 1. Ananthanarayan R. and Paniker C.K.J. (2009) Textbook of Microbiology. 8th edition, University Press Publication
- Praful B. Godkar & Darshan P. Godkar (2014). Text Book of Medical Laboratory Technology, Clinical Laboratory Science & Molecular Diagnosis, 3rd Ed., Bhalani Publishing House.
- 3. D.R. Arora (2020). Text Book of Microbiology, 6th Ed., CBS Publishers.

Reference Books

- 1. Sastry Apurba S, (2021), Essentials of Medical Microbiology, 3rd Ed., Jay Pee Publishers.
- 2. Brooks G.F., Carroll K.C., Butel J.S., Morse S.A. and Mietzner, T.A. (2013)
- 3. Adelberg's Medical Microbiology. 26th edition. McGraw Hill Publication
- 4. Goering R., Dockrell H., Zuckerman M. and Wakelin D. (2007) Mims' Medical Microbiology. 4th edition. Elsevier.

M.Sc.-MLT (Medical Microbiology & Immunology) Semester-III

VIROLOGY Subject Code: MMLT-302MI Theory- Min. Hrs -: 60 Hrs., Practical- Min. Hrs -: 60 Hrs.

Course Outcomes

- To understand the basics of various viruses.
- Various diseases caused by viruses, general characteristics and lab diagnosis of various medically important viruses.
- To understand the introduction general characteristics and lab diagnosis of various medically important viruses.

THEORY

- **Parvoviruses** : Morphology, Classification, Pathogenesis, Clinical Manifestations, Erythema infectiosum, Lab Diagnosis, Molecular Method, Antibody Detection.
- Adenoviruses Morphology, Classification, Pathogenesis, Clinical Manifestations, Respiratory Diseases, Pneumonia, Occular infections, Infantile gastroenteritis, Lab Diagnosis, Specimen collection, Virus isolation, General preventive measures
- **Herpes viruses** General properties, morphology, classification, herpes simplex virus, pathogenesis, primary infection, latent infection, recurrent infection, clinical manifestations, oral facial, nervous, cutaneous, ocular, genital, visceral, neonatal herpes, lab diagnosis, cytopathology, virus isolation, antibody detection.
- **Pox viruses** Morphology, classification, small pox, differences between small pox and chicken pox, molluscum contagiosum virus-*clinical manifestation, transmission, lab diagnosis*.
- Orthomyxo viruses Influenza viruses- Morphology, Antigenic variation, Antigenic shift and antigenic drift, pathogenesis, Transmission-target cell entry, spread, local damage, clinical manifestations, incubation period, flu syndrome- complications, lab diagnosis, specimens, collection, isolation of viruses, detection of virus, direct immunofluorescence test, molecular method, antibody detection.
- **Mumps viruses-**Pathogenesis, clinical manifestations, incubation period in apparent infection, bilateral parotitis, aseptic meningitis, oophoritis, lab diagnosis, specimens, direct viral antigen, detection, viral isolation, serum antibody detection
- **Measles viruses** Pathogenesis, clinical manifestations, incubation period, prodromal stage, eruptive, post measles, complications, secondary bacterial infections, central nervous system complications, lab diagnosis, specimens, antigen detection, virus isolation, antibody detection, reverse transcriptase, PCR.
- **Picorna viruses** Classification, Morphology, enteroviruses, Polio virus, antigenic types, pathogenesis, transmission, clinical manifestations, risk factors, lab diagnosis, virus isolation, antibody detection, vaccines, injectiable polio vaccine, IPV salk vaccine, advantages, disadvantages, oral polio vaccine (OPV), sabin vaccine, advantages, disadvantages.
- **Miscellaneous RNA viruses** Corona viruses- morphology, classification, human corona viruses, transmission, lab diagnosis, antigen detection, RNA detection, isolation, serum antibody detection, treatment & prevention.
- **Hepatitis viruses-** Hepatitis A, B, C, D & E- morphology, resistance, mode of transmission, clinical manifestations, lab diagnosis.

PRACTICAL

- ELISA tests
- Lab diagnosis of viral infections
- Cultivation of viruses

<u>Text Books</u>

- 5. Willey JM, Sherwood LM, and Woolverton CJ. (2013) Prescott, Harley and Klein's Microbiology. 9th edition. McGraw Hill Higher Education.

M.Sc.-MLT (Medical Microbiology & Immunology) Semester-III

MYCOLOGY Subject Code: MMLT-303MI Theory- Min. Hrs -: 60 Hrs., Practical- Min. Hrs -: 60 Hrs.

Course Outcomes

- To understand the basics of various fungi.
- Various diseases caused by fungi
- To understand the introduction, general characteristics and lab diagnosis of various medically important fungi.

THEORY

• Study of Fungi

Classification, morphological classification, yeast, yeast like fungus, molds, dimorphic fungi, classification of fungal diseases, superficial mycosis, subcutaneous mycosis, systemic mycosis, opportunistic mycosis

Lab diagnosis of fungal diseases

Specimen collection, microscopy, KOH preparation, gram stain, India ink stain, calcofluor, white stain, histopathological stain- PAS, GMS, mucicarmine, lactophenol cotton blue, culture, culture media, sabouraud's dextrose agar, Corn meal agar and rice starch agar, brain heart infusion agar.

• Superficial mycosis

Tinea versicolor, clinical manifestation, lab diagnosis, direct microscopy culture, tinea nigra, piedra- black piedra & white piedra.

• Dermatophytosis, Tinea Ring Worm

Pathogenesis, clinical types, lab diagnosis, specimen collection, direct examination, culture, macroscopic and microscopic.

• Subcutaneous mycosis

Mycetoma – Types of mycetoma, pathogenesis, clinical manifestations, lab diagnosis, specimen collection, direct examination, culture.

Sporotricosis – pathogenesis, clinical manifestations, lab diagnosis, direct microscopy, histopathological staining, culture,

Rhinosoporidiosis – Agent, source, distribution and diagnosis.

• Systemic Mycosis

Histoplasmosis–Causative agent, pathognenesis, clinical manifestations, pulmonary, mucocutaneous, disseminated, lab diagnosis, specimen, direct microscopy, culture, serology.

Blastomycosis- Pathogensis, clinical manifestations, lab diagnosis.

Coccidioido mycosis - Pathogenesis, clinical manifestations, lab diagnosis.

Opportunistic mycosis

Candidiasis- Pathogenesis, predisposing factor, clinical manifestation, mucosal, cutaneous, invasive, allergic, lab diagnosis-direct microscopy, culture.

Cryptococosis- Pathogenesis, virulence factors, risk factors, clinical manifestations, pulmonary, meningitis, lab diagnosis – direct detection methods, negative staining & Gram staining, culture.

Mucormycosis-Pathogenesis, predisposing factors, clinical manifestations, lab diagnosis, staining, culture, microscopic appearance.

PRACTICAL

- Lab diagnosis of fungal infections.
- Various medias used for fungus.
- Identification of fungus from various specimens.

Text Books

- 1. Praful B. Godkar & Darshan P. Godkar (2014). Text Book of Medical Laboratory Technology, Clinical Laboratory Science & Molecular Diagnosis, 3rd Ed., Bhalani Publishing House.

Semester-III

Common to all specialization/discipline

DISSERTATION

Min. Hrs -: 40 Hrs.

Students will do the research work for their dissertation as per the synopsis.

TEACHING SKILLS/SEMINARS / SYMPOSIA/ JOURNAL CLUB ETC. Min. Hrs -: 80 Hrs.

(a) Teaching Skills

Candidates should be encouraged to teach undergraduate students if any. This performance will be based on assessment by the faculty members of the department and from feedback from the undergraduate students.

(b) Seminar

- Seminars /recent advance presentation will be held every week, however, its timings are subject to clinical schedule. Topics must be well researched and must include common knowledge, recent advances, analysis and references.
- PG students should present minimum of two seminars (One in general and one in elective area) and Internal Assessment marks will depend on better topic selection and presentation.

(c) Journal Review Meeting (Journal Club):

The ability to do literature search, in depth study, presentation skills, and use of audio- visual aids are to be assessed. The assessment is made by faculty members and peers attending the meeting.

(d) Work diary / Log Book

Every student shall maintain a work diary and record his/her participation in the training programmes conducted by the department such as journal reviews, seminars, etc. Special mention may be made of the presentations by the candidate as well as details of clinical practice, if any conducted by the candidate by the student.

Semester-III Common to all Specialization/Discipline

CLINICAL TRAINING/ CAMPS

Min. Hrs -: 180 Hrs.

The students will get their clinical training in a medical college / 100 bedded hospital with well-equipped Pathology/ Clinical Biochemistry/ Medical Microbiology Laboratory.

They will participate in various medical camps.

M.Sc.-MLT (Medical Microbiology & Immunology) Semester-IV

APPLIED MICROBIOLOGY & IMMUNOLOGY Subject Code: MMLT-401MI Theory- Min. Hrs -: 80 Hrs., Practical- Min. Hrs -: 80 Hrs.

Course Outcomes

- To understand the various aspects of microbiology in causation of diseases.
- To understand the various hospital acquired infections.
- To understand the prevention of various diseases.

THEORY

APPLIED MICROBIOLOGY

- Urinary Tract Infections- Classification, epidemiology, Predisposing factors, prevalence, gender, age, pregnancy, vesico ureteric reflux, genetic factor, causative agents, pathogenesis, ascending root infection, descending root infection, host defence mechanism, clinical manifestation, asymptomatic bacteuria, lower UTI, upper UTI, cystitis, acute urethral syndrome, pyelonephritis, lab diagnosis, specimen collection, transport, culture and direct examination.
- **Diarrheal diseases-** Diarrhea, gastroentitis, dysentery, food poisoning, travelers diarrhea, etiological agents, pathogenesis, toxin production, host factors, lab diagnosis by specimen collection, microscopy, wet mount, hanging drop, grams staining, AFB staining, electro microscopy, bacterial culture, tissue culture, antigen detection, molecular method, toxin detection.
- Meningitis -Definition, types of meningitis, causative agents, pathogenesis, roots of infections, hematogenous, direct defect in CNS, predisposing factors, vaccination age, presence of CSF shunts, clinical manifestations, lab diagnosis, specimen collection, CSF collection, CSF transport, biochemical analysis and cell count of CSF, Bacterial meningitis, tubercular meningitis, viral meningitis, CSF microscopy, gram's staining, ZN staining, India ink, antigen detection from CSF, bacteriological culture, antibody detection.
- Fever of unknown origin Definition, causes, lab diagnosis, specimen collection, microscopy, culture, serological method, molecular tests.
- **Respiratory tract infection-** upper respiratory tract infection, lower respiratory tract infection, pneumonia, clinical symptoms- Lobar pneumonia, atypical pneumonia, bronchitis, bronchiolitis, lab diagnosis, specimen collection, culture, identification & serology.
- Hospital acquired infections Definition, factors, immune status, hospital environment, hospital
 organisms, transfusion, sources of infection, endogenous source, exogenous source, microorganisms
 for hospital acquired infections, mode of transmission, types of hospital acquired infections, prevention
 of hospital acquired infections, standards precautions, specific precautions, air born droplet contacts
 precautions, hand hygiene, hand rub and hand wash, methods.

IMMUNOLOGY

- Antigen Types, epitopes, factors affecting antigenicity, clinical significance, biological classes and super antigens.
- Immunoglobulin Properties, abnormal immunoglobulins, immunoglobulin classes, IgG, IgA, IgM, IgD, IgE,
- **Hypersensitivity reaction** (Type 1, Type 2, Type 3, Type 4) Anaphylactic, Cytotoxic, Immune complex mediated, Delayed or cell- mediated.
- Antigen antibody reaction:- Precipitation, Agglutination, Complement fixation, Neutralization, Immunoflurosence, Radioimmunoassay, ELISA
- Auto Immune Diseases.

PRACTICAL

- 1. Antistreptolysin -O test
- 2. VDRL Testing
- 3. CRP Testing
- 4. Enzyme linked immunosorbent assay.

Text Books

- 1. Ananthanarayan R. and Paniker C.K.J. (2009) Textbook of Microbiology. 8th edition, University **Press Publication**
- 2. Praful B. Godkar & Darshan P. Godkar (2014). Text Book of Medical Laboratory Technology, Clinical Laboratory Science & Molecular Diagnosis, 3rd Ed., Bhalani Publishing House.
- 3. D.R. Arora (2020). Text Book of Microbiology, 6th Ed., CBS Publishers.

Reference Books

- 1. Abbas AK, Lichtman AH, Pillai S. (2007). Cellular and Molecular Immunology. 6th edition Saunders Publication, Philadelphia.
- Delves P, Martin S, Burton D, Roitt IM. (2006). Roitt's Essential Immunology.11th edition Wiley-2. Blackwell Scientific Publication, Oxford.
- 3. Goldsby RA, Kindt TJ, Osborne BA. (2007). Kuby's Immunology. 6th edition W.H. Freeman and Company, New York.
- Stefan (2020), Jawetz Melnick Adelbergs Medical Microbiology, 28th Ed., MacGraw Hill.
 Sastry Apurba S, (2021), Essentials of Medical Microbiology, 3rd Ed., Jay Pee Publishers.
- 6. Adelberg's Medical Microbiology. 26th edition. McGraw Hill Publication.

M.Sc.-MLT (Medical Microbiology & Immunology) Semester-IV

PARASITOLOGY Subject Code: MMLT-402MI Theory- Min. Hrs -: 80 Hrs., Practical- Min. Hrs -: 80 Hrs.

Course Outcomes

- To provide brief knowledge of parasites involved in human infections.
- To understand the life cycle and lab diagnosis of various medically important human parasites.
- To understand the general characteristics of medically important parasites.

THEORY

Study of morphology, important developmental stages, symptoms, pathogenesis & diagnosis of

- Entamoeba histolytica
- Entamoeba coli
- Giardia
- Trichomonas
- Balantidium coli
- Malarial parasites
- Plasmodium
- Taenia sollium

- Taenia saginatta
- Schistostoma Haemotobium
- Fasciola hepatica
- Ascaris
- Enterobius
- Ancylostoma,
- Wuchereria bancrofti

PRACTICAL

- Diagnostic tests for detection of parasitic infections- methods for demonstration of parasites in clinical specimens
- Identification of different Ova and Cysts in stool.
- Stool examination

Text Books

- 1. Sougata Ghosh (2021). Paniker Textbook of Medical Parasitology, 9th Ed., Jaypee Brothers.
- 2. Ananthanarayan R. and Paniker C.K.J. (2009) Textbook of Microbiology. 8th edition, University Press Publication.
- 3. D.R. Arora (2020). Text Book of Microbiology, 6th Ed., CBS Publishers.

Reference Books

- 1. Brooks G.F., Carroll K.C., Butel J.S., Morse S.A. and Mietzner, T.A. (2013). Adelberg's Medical Microbiology. 26th edition. McGraw Hill Publication.
- 2. Goering R., Dockrell H., Zuckerman M. and Wakelin D. (2007) Mims' Medical Microbiology. 4th edition. Elsevier
- Willey JM, Sherwood LM, and Woolverton CJ. (2013) Prescott, Harley and Klein's Microbiology. 9th edition. McGraw Hill Higher Education Adelberg's Medical Microbiology. 26th edition. McGraw Hill Publication.

M.Sc.-MLT, Semester-IV

Common to all specialization/discipline

DISSERTATION Subject Code: MMLT-403MI Min. hours- 120 hrs.

Every candidate pursing M.Sc.-MLT degree course is required to carry out research work on a selected research project under the guidance of a recognized postgraduate teacher. The results of such a work shall be submitted in the form of dissertation. Topic for dissertation shall be assigned by the guide.

If the subject of Thesis entails collaboration with other departments or specialties, the collaborative portion of the work will be supervised by Co-Guide, designated by the University Institute of Health Sciences in consultation with the Guide. Where a Co-Guide is involved, the Thesis will be certified jointly by the Guide & Co-guide.

Every candidate shall submit synopsis to the University in the prescribed Performa containing particulars of proposed dissertation work, within 6 months from the date of commencement of the course on or before the dates notified by the university. The synopsis shall be sent through the proper channel. Such synopsis will be reviewed and the university will register the dissertation topic.

No change in the dissertation topic or guide shall be made without prior approval of the university. Guide will be only a facilitator, advisor of the concept and hold responsible in correctly directing the candidate in the methodology and not responsible for the outcome and results.

The dissertation should be written under the following headings.

- 1. Introduction
- 2. Aims or objectives of study
- 3. Review of literature
- 4. Material and methods
- 5. Results
- 6. Discussion
- 7. Conclusion
- 8. References
- 9. Master and Chart & Table (If Applicable)
- 10. Annexure (If Applicable)

The written text of dissertation/ research project shall not be less than 50 pages and shall not exceed 120 pages excluding references, tables, questionnaires and other annexure. It should be neatly typed in double line spacing on one side of bond paper (A4 size, 8.27" x 11.69") and bound properly. Spiral binding should be avoided. A declaration by the candidate for having done the work himself should also be included, and the guide, head of the department and Director/Coordinator of the institute shall certify the dissertation/ research project.

Every candidate is required to give power point presentation before final submission of dissertation. Four copies of Dissertation/research project shall be submitted to the university, through proper channel, along with a soft copy (CD), 2 months before the final examination. It shall be assessed by two examiners appointed by the university, one internal and one external. There will be a power point open presentation of the submitted dissertation as per the schedule given by the university. This presentation shall be jointly evaluated by external and internal examiner as per the criteria given below:

Total	300 Marks
Conclusion & outcome	50 Marks
Result and Discussion	100 Marks
Methodology adopted	100 Marks
Objective(s) of the work done	50 Marks

To pass in the dissertation a student must secure 150 marks.

If the student failed to secure the minimum passing marks he will resubmit the dissertation 1½ month before the supplementary exam.

M.Sc.-MLT, Semester-IV

Common to all specialization/discipline

TEACHING SKILLS/SEMINARS / SYMPOSIA/ JOURNAL CLUB ETC. Min. Hrs -: 100 Hrs.

(a) Teaching Skills

Candidates should be encouraged to teach undergraduate students if any. This performance will be based on assessment by the faculty members of the department and from feedback from the undergraduate students.

(b) Seminar

- Seminars /recent advance presentation will be held every week, however, its timings are subject to clinical schedule. Topics must be well researched and must include common knowledge, recent advances, analysis and references.
- PG students should present minimum of two seminars (One in general and one in elective area) and Internal Assessment marks will depend on better topic selection and presentation.

(c) Journal Review Meeting (Journal Club):

The ability to do literature search, in depth study, presentation skills, and use of audio- visual aids are to be assessed. The assessment is made by faculty members and peers attending the meeting.

(d) Work diary / Log Book

Every student shall maintain a work diary and record his/her participation in the training programmes conducted by the department such as journal reviews, seminars, etc. Special mention may be made of the presentations by the candidate as well as details of clinical practice, if any conducted by the candidate by the student.

M.Sc.-MLT, Semester-IV

Common to all specialization/discipline

CLINICAL LAB PRACTICES OR CLINICAL TRAINING

Min. Hrs -: 180 Hrs.

Clinical Lab Practices

Post graduate students must do:

- Sample collection, storages & analysis of every sample given to them for various parameters.
- They should know proper laboratory management.
- They should work on every instrument according to their specialization.
- Maintenance and care of the instrument of the laboratory.
- They will do hospital/laboratory/blood bank postings for training & skill development.

OR

Clinical Training

The students will get their clinical training in a medical college / 100 bedded hospital with well-equipped Pathology/ Clinical Biochemistry/ Medical Microbiology Laboratory for at least one month.
