Master of Physiotherapy (M.P.T.)
Academic Programme

Specialization/Discipline:
Neurology

Ordinance according to
NEP-2020

Duration:
2 Years (04 Semesters)

M.P.T. (Master of Physiotherapy)

ORDINANCE

Chapter

"A"

Preamble:

The Master of Physiotherapy course is a 2-year fulltime program with 4 semesters leading to the degree that equips the student with analytical, evidence based and Hands on learning skills. The program is generic in nature and has a component of additional learning of one area leading to an elective in that area. Psychosomatic aspects of training are a component through all the elective areas.

Title of the Programme: The programme shall be called "**Master of Physiotherapy**"

Objectives of the Programme:

At the completion of this course, the student should be –

- Able to execute all routine physiotherapeutic procedures with evidence based practice.
- Able to be a prominent member of the multidisciplinary physiotherapy team and treat all the conditions which need physiotherapeutic procedures.
- Able to provide adequate knowledge about the treatment procedures and its benefit.
- Able to transfer knowledge and skills to students as well young professionals.
- Able to perform independent physiotherapy assessment and treatment for patients.
- Able to undertake independent research in the field of physiotherapy.
- Learn multidisciplinary practice skills.
- Able to practice and assess patient independently.
- On successful completion of M.P.T programme, the Physiotherapist professional will be able to take up physiotherapy teaching assignments independently for undergraduate teaching programme. He / She will be able to prepare project proposal with selected research design and interpret the evaluated outcome measures (using sound data processing techniques and statistical methods). He/she will be able to practice in his / her specialty area with advanced knowledge and skills.

1. M.P.T. degree will be under the faculty of Medicine of C.S.J.M. University, Kanpur in the department of physiotherapy

2. Duration of Course:

- MPT course will be a full-time course.
- Duration will be two years (Four Semesters).

This course shall be divided into four semester examinations namely Master of Physiotherapy

I & II Semester (First Academic Year) and III & IV Semester (Second Academic Year).

3. Specialization/Discipline

There shall be following specialization/discipline:

- **MPT in Orthopaedics**
- **MPT in Sports**
- **MPT in Neurology**
- **MPT in Cardiopulmonary Disorders**

4. Seats:

Specialization/Discipline	No. of Seats
MPT in Orthopaedics	05 Seats
MPT in Sports	05 Seats
MPT in Neurology	05 Seats
MPT in Cardiopulmonary Disorders	05 Seats

5. Admission.

Eligibility:

The students who have passed BPT (Bachelor of Physiotherapy) Course from any recognized Institutions/University with minimum of 55% marks (50% for SC/ST).

Mode of Admission:

As per the University Norms.

6. Medium of instruction:

English shall be the medium of instruction in the class and in the University examination.

7. Method of Teaching:

The method of teaching adopted shall be a combination of lectures, demonstrations and practicals by the full time faculty, visiting or part time or guest faculty.

8. Examination:

As per the University norms.

Duration of examination:

As per the University norms.

9. Attendance to appear in the end semester examination :

The permission to appear in end semester examination shall be granted to such candidate only who have fulfill the condition of 75% attendance in each subject separately in theory and practical as per the university rule.

Regarding attendance requirements students will have to fulfill the condition of 75% attendance. 15% relaxation in attendance, in exceptional circumstances can be made by the Vice Chancellor on the recommendation of the Director/Coordinator/Head of the Institute/Department.

M.P.T. (Master of Physiotherapy)

Program outcomes

- Course work includes exercise physiology, principles of physiotherapy practice, electrophysiology and electives. The student will be skilled in treatment planning, management, administration of physiotherapy treatment and provision of patient support.
- Acquire in-depth knowledge of structure and function of human body related to the respective branch of specialty.
- Acquire the in-depth knowledge of movement dysfunction of human body, cause thereof principles underlying the use of physiotherapeutic interventions for restoring movement dysfunction towards normalcy.
- Demonstrate skill in Physical & Functional diagnosis pertaining to patient under his/her care.
- Demonstrate ability to critically appraise recent physiotherapeutic and related literature from journals & adopt diagnostic & therapeutic procedures based on it.
- The student will also perform independent research within the department and help the department and the team for treatment planning of the patient.
- PT post-graduate is encouraged to pursue further qualification to attain senior position in the professional field, also to keep abreast with the advance and new technology the professional should opt for continuous professional education credits offered by national and international institutes.
- Employment opportunities can be found in hospitals in both private and public sectors as well as in independent physiotherapy clinics and as well as teaching institutes.
- Demonstrate ability to make clinical decision (based on evaluation) regarding Physiotherapy strategy techniques and select appropriate outcome measures based on the comprehensive knowledge of specialty.
- Demonstrate an expertise in evidence-based skill in the management disorders including movement dysfunction in concerned specialty.

Program Specific Outcomes

At the completion of this course, the student should be –

- Able to execute all routine physiotherapeutic procedures with evidence based practice.
- Able to be a prominent member of the multidisciplinary physiotherapy team and treat all the conditions which need physiotherapeutic procedures.
- Able to provide adequate knowledge about the treatment procedures and its benefit.
- Able to transfer knowledge and skills to students as well young professionals.
- Able to perform independent physiotherapy assessment and treatment for patients.
- Able to undertake independent research in the field of physiotherapy.
- Learn multidisciplinary practice skills.
- Able to practice and assess patient independently.
- On successful completion of M.P.T programme, the Physiotherapist professional will be able to take up physiotherapy teaching assignments independently for undergraduate teaching programme. He / She will be able to prepare project proposal with selected research design and interpret the evaluated outcome measures (using sound data processing techniques and statistical methods). He/she will be able to practice in his / her specialty area with advanced knowledge and skills.

SCHEME OF EXAMINATION

INTERNAL ASSESSMENT

- It will be for theory and practical both.
- It will be done through the whole semester.
- The candidate must obtain at least 40% marks in theory and practical separately in internal assessment to be eligible for the semester University examination.
- Internal assessment (Theory) will be done as follows:

a)	Mid-sem./Class Test	= 10 marks
b)	Assignments/Projects/Clinical Presentations	= 10 marks
c)	Attendance	= 05 marks
Total		= 25 marks

Internal assessment (Practical) will be done as follows:

a)	Laboratory manual	= 10 marks
b)	Day to day performance	= 10 marks
c)	Attendance	= 05 marks
Total		= 25 marks

CRITERIA FOR PASSING

- As per the University Norms.

Maximum duration for completion for course

- A candidate shall complete the course within four years from date of admission failing which the candidate will be discharged.

DIVISION:

- As per the University Norms.

DEGREE:

The degree of MPT course of the University shall be conferred according to specialization/discipline on the candidates who have pursued the prescribed course of study for not less than two academic years and have passed examinations as prescribed under the relevant scheme.

Monitoring Progress of Studies

It is essential to monitor the learning progress of each candidate through continuous appraisal and regular internal assessment. It also helps teachers to evaluate students, but also students to evaluate themselves. The monitoring is done by the faculty members of the department based on participation of students in various teaching / learning activities.

(a) Seminar

- Seminars /recent advance presentation will be held every week, however, its timings are subject to clinical schedule. Topics must be well researched and must include common knowledge, recent advances, analysis and references.
- PG students should present minimum of two seminars (One in general and one in elective area) and Internal Assessment marks will depend on better topic selection and presentation.

(b) Case Presentation

- PG students are expected to do at least one case presentation per month. They can choose the patient depending on the availability of cases. However, appropriateness should be confirmed with concern teacher.
- If the first presentation is unsatisfactory, students can do one more case presentation in the same posting for the improvement of the internal assessment.

(c) Clinical Practices

Post graduate students must know:

- Assessment, evaluation and diagnosis.
- Practice and application of physiotherapeutic system in hospital/institution.
- Application of advance physiotherapeutic maneuvers like manipulation and various neurological interventional concepts.
- Clinical reasoning, decision making, evidence based practice and recording system.

(d) Teaching Skills

Candidates should be encouraged to teach undergraduate students if any. This performance will be based on assessment by the faculty members of the department and from feedback from the undergraduate students.

(e) Journal Review Meeting (Journal Club):

The ability to do literature search, in depth study, presentation skills, and use of audio- visual aids are to be assessed. The assessment is made by faculty members and peers attending the meeting.

(f) Work diary / Log Book

Every student shall maintain a work diary and record his/her participation in the training programmes conducted by the department such as journal reviews, seminars, etc. Special mention may be made of the presentations by the candidate as well as details of clinical practice, if any conducted by the candidate by the student.

(g) Mid Term Examination/Class Test/Assignments

There will be mid term examination of the students on every academic year. Various class tests may be taken by the department and assignments may be given to students on various topics. Marks of mid term examination will be included in internal assessment.

(h) Records

Records, log books and marks obtained in mid term exam/tests will be maintained by the Head of the Department and will be made available to the University.

Ramkishore

Veer

Munish Kashyap

Dissertation

Every candidate pursuing MPT degree course is required to carry out research work on a selected research project under the guidance of a recognized postgraduate teacher. The results of such a work shall be submitted in the form of dissertation. Topic for dissertation shall be assigned by the guide.

If the subject of Thesis entails collaboration with other departments or specialties, the collaborative portion of the work will be supervised by Co-Guide, designated by the School of Health Sciences in consultation with the Guide. Where a Co-Guide is involved, the Thesis will be certified jointly by the Guide & Co-guide.

Every candidate shall submit synopsis to the University in the prescribed Performa containing particulars of proposed dissertation work, within 6 months from the date of commencement of the course on or before the dates notified by the university. The synopsis shall be sent through the proper channel. Such synopsis will be reviewed and the university will register the dissertation topic.

No change in the dissertation topic or guide shall be made without prior approval of the university. Guide will be only a facilitator, advisor of the concept and hold responsible in correctly directing the candidate in the methodology and not responsible for the outcome and results.

The dissertation should be written under the following headings.

1. Introduction
2. Aims or objectives of study
3. Review of literature
4. Material and methods
5. Results
6. Discussion
7. Conclusion
8. References
9. Master and Chart & Table (If Applicable)
10. Annexure (If Applicable)

The written text of dissertation/ research project shall not be less than 50 pages and shall not exceed 120 pages excluding references, tables, questionnaires and other annexure. It should be neatly typed in double line spacing on one side of bond paper (A4 size, 8.27" x 11.69") and bound properly. Spiral binding should be avoided. A declaration by the candidate for having done the work himself should also be included, and the guide, head of the department and Director/Coordinator of the institute shall certify the dissertation/ research project.

Every candidates required to give power point presentation before final submission of dissertation. Four copies of Dissertation/research project shall be submitted to the university, through proper channel, along with a soft copy (CD), 6 months before the final examination. It shall be assessed by two examiners appointed by the university, one internal and one external. There will be a power point open presentation of the submitted dissertation as per the schedule given by the university. This presentation shall be jointly evaluated by external and internal examiner as per the criteria given below:

Objective(s) of the work done	50 Marks
Methodology adopted	100 Marks
Result and Discussion	100 Marks
Conclusion & outcome	50 Marks
Total	300 Marks

To pass in the dissertation a student must secure 150 marks.

If the student failed to secure the minimum passing marks he will resubmit the dissertation 01 month before the supplementary exam.

Ram Krishore

Veer

Munish Kumar

Guide:**I. Eligibility for guide for each specialty**

- Full time faculty involved in teaching in the same department/institute.
- Minimum MPT with 3 years teaching experience in related subject as a full time faculty.

The Vice Chancellor of the University can appoint a person as a guide whom he/she considers suitable.

II. Age of Guide

The age of guide should not exceed 62 years or as per university norms.

III. Guide student ratio

1: 5

A recognized guide shall supervise dissertation work of not more than 5 students per academic year.

IV. Change of Guide

In the event of registered guide leaving the department/institute or in the event of death of guide, guide may be change with prior permission from the university.

Master in Physiotherapy (MPT) Semester-I
Review of Basic Physiotherapeutics
Subject Code : MPT-101
Min. Hrs :- 80 Hrs.

COURSE OBJECTIVES:

- a) To have a thorough understanding of Exercise therapy, electrotherapy, kinematics and kinetics in motion.
- b) To have an understanding of structure and function of biological tissues involve in the human motion.
- c) To evaluate movement and estimate force on human structure during exercise.
- d) To understand the functioning operating physiological mechanism and uses of biomechanical instruments.

COURSE OUTCOMES:

- a) Students will be able to understand and apply concepts and terminology with in the area of Exercise therapy, electrotherapy and biomechanics.
- b) Students will be able to describe how biomechanical factors influence motion in exercise.
- c) Demonstrate and understanding of statics, kinematics and kinetics in human motion.
- d) Apply a broad and coherent knowledge of the underlying principles and concepts of biomechanics particularly in the field of kinematics and kinetics as applied to human and projectile motion.
- e) Safely and effectively use biomechanics instrumentation and equipment to record and assess human and object motion.
- f) Record, extract and analyze key information about human and object.

THEORY

EXERCISE THERAPY

- General Exercise therapy and principles
- Assessment Methods & Techniques (like MMT, Anthropometry & Goniometry etc.).
- Functional diagnosis measures: Functional activity specific assessment-FIM, ADL Scales, Assessment of health wellness: SF-36.
- Responses and adaptations of various systems to exercise and training.
- Physiology of movements
- Strengthening exercise
- Stretching and soft tissue mobilization and manipulation
- Relaxation, traction
- Hydro therapy, Balance and co-ordination.
- Recent advances in exercise therapy

ELECTROTHERAPY

- General electrotherapy and principles.
- Low, medium and high frequency current and modalities
- Di-dynamic, Russian and High volt currents
- Cryotherapy
- Electro Physiological assessment devices.
- Muscle plasticity in response to electrical stimulation
- Electrical stimulation and its effect on various systems.
- Recent advances in electrotherapy

BIOMECHANICS, KINESIOLOGY AND PATHO-MECHANICS

- General Biomechanics, Kinesiology and principles.
- Bone, Joint, articular cartilage, various soft tissue and nerve.
- Biomechanics and pathomechanics
- Biomechanics, kinesiology and pathomechanics and all joints and muscles.
- Evaluation and assessment of postures, abnormal postures, gait and abnormal gaits.
- Evaluation and assessment of joint motions and muscle function.

Master in Physiotherapy (MPT) Semester-I
Advanced Physiotherapeutics-I
Subject Code : MPT-102
Min. Hrs -: 80 Hrs.

COURSE OBJECTIVES:

- a) To have a thorough understanding of Advance manual therapy approaches.
- b) To have an understanding of structure and function of biological tissues involve in the human motion.
- c) To evaluate movement and estimate force on human structure during exercise.
- d) To understand the functioning operating physiological mechanism and uses of biomechanical instruments.

COURSE OUTCOMES:

- a) Students will be able to understand and apply concepts and terminology with in the area of manual therapy.
- b) Students will be able to describe how manual therapy.
- c) Apply a broad and coherent knowledge of the underlying principles and concepts of biomechanics particularly in the field of kinematics and kinetics as applied to human and projectile motion.
- d) Safely and effectively use biomechanics instrumentation and equipment to record and asses human and object motion.
- e) Record, extract and analyze key information about human and object.

MANUAL THERAPY

Part-I: Foundational concepts in Manual therapy Unit

1. History of manual therapy
2. Biomechanical principles in manual therapy
 - Concave-Convex rule
 - Close pack and Loose pack Positions
 - Resting positions
 - Joint status
 - Barrier concepts
 - Fryette's Laws
 - Articular neurology
4. Pain

Part-II: Joints Mobilization Techniques

(Terminology, Principles, Indications, Contra-indications, Assessment and method of application of the following techniques)

1. Kalten born
2. Maitland
3. Mulligan
4. McKenzie
5. Cyriax
6. Butler neural mobilization

Nerve Conduction studies, EMG and Biofeed Back

Theory

- Physiology and nerve conduction
- Electrical activities of muscles
- Different type of EMG recording in normal and abnormal muscles.
- MNCV, SNCV, 'H' reflex, F, wave & blink reflex.
- Procedure and recording methods mechanisms
- Physiology and mechanisms bio feed, procedure and application of various disorders.

Master in Physiotherapy (MPT) Semester-I
Research Methodology
Subject Code : MPT-103
Min. Hrs -: 80 Hrs.

COURSE OBJECTIVE:

- a) To have a thorough understanding of presenting supporting evidences and how to conduct research.
- b) To have an understanding of model of research and biostatistics.
- c) To evaluate every procedure on the basis of evidences.
- d) To understand the data analysis procedure and their significance in research.

COURSE OUTCOMES:

- a) Students will be able to understand and apply concepts and terminology with in the area of Research.
- b) Students will be able to describe research design and application of different methods to analyze the data collected to conduct and complete the research.

RESEARCH METHODOLOGY

1. Research in physiotherapy

- Introduction
- Research for Physiotherapist: Why? How? And When?
- Research – Definition, concept, purpose, approaches
- Internet sites for Physiotherapist

2. Research Fundamentals

- Define measurement
- Measurement framework
- Scales of measurement
- Pilot Study
- Types of variables
- Reliability & Validity
- Drawing Tables, graphs, master chart etc

3. Writing a Research Proposal, Critiquing a research article

- Defining a problem
- Review of Literature
- Formulating a question, Operational Definition
- Inclusion & Exclusion criteria
- Forming groups
- Data collection & analysis
- Results, Interpretation, conclusion, discussion
- Informed Consent
- Limitations

4. Research Design

- Principle of Designing
- Design, instrumentation & analysis for qualitative research
- Design, instrumentation & analysis for quantitative research
- Design, instrumentation & analysis for quasi-experimental research
- Design models utilized in Physiotherapy

5. Research Ethics

- Importance of Ethics in Research
- Main ethical issues in human subjects' research
- Main ethical principles that govern research with human subjects
- Components of an ethically valid informed consent for research

Master in Physiotherapy (MPT) Semester-I
Practical
Subject Code : MPT-104
Min. Hrs :- 160 Hrs.

COURSE OUTCOME:

It should be aimed for assessing competence and skills of physiotherapeutic intervention and procedures as well as testing students ability to make relevant and valid observations, diagnostic & prognostic interpretations and inference, clinical, laboratory or experimental work relating to this her subject.

1. Assessment, evaluation and diagnosis
2. Practice and application of physiotherapeutic system in hospital/centre/ institution.
3. Application of advance physiotherapeutic maneuvers like manipulation (maitland, cyriax, mulligan etc.) and various neurological interventional concepts (bobath, NDT etc.).
4. Clinical reasoning, decision making, evidence based practice and recording system.
5. Short case from area of elective to assess investigative and diagnostic skills
6. Short case from area of elective to assess patient management skills

Ramkishore

Veer

Manish Kumar

Digvijay

Master in Physiotherapy (MPT) Semester-II
Basics of Exercise Physiology & Nutrition
Subject Code : MPT-201
Min. Hrs :- 80 Hrs.

COURSE OBJECTIVES: On completion of the subject, students will have the opportunity to develop the skills of intellect decision making. It also provides an extension of their communication skills to articulate the evidence based acquaintance and clinical knowledge for assessment and diagnosis of patients. It is a prospect to the students for the application of the research and professional information to novel situations.

COURSE OUTCOME: On completion of this subject students should have the opportunity to:

- a) Strengthen the basic fundamental basis of assessment and diagnosis and postulate this knowledge in clinical practice.
- b) Analyses critical evaluate the patient conditions and formulation of accurate diagnosis.
- c) Acquire a thorough understanding of basic exercise physiology which can be applied in clinical practice.

I. Bioenergetics of exercise :

- a) High energy phosphates,
- b) Anaerobic and aerobic ATP synthesis,
- c) Bioenergetics Control, exercise intensity & substrate utilization, Protecting CHO stores,
- d) Muscle adaptation to endurance training, processes that potentially limit the rate of fat oxidation,
- e) Regulation of substrate utilization, training - induced increase in FFA oxidization: Basal metabolic and resting metabolic rates and factors affecting them,
- f) Classification of Physical Activities by energy expenditure,. Concept of MET , measurement of energy cost of exercise

II. Nutrition

- a) Metabolism of Carbohydrate , fats and proteins , vitamin, mineral and water

III. Nutrition in exercise

- a) Optimum nutrition for exercise
- b) Nutrition for physical performance
- c) Pre-game meal
- d) Carbohydrate loading
- e) Food for various athletic events
- f) Fluid and energy replacement in prolonged exercise

I. Respiratory responses to exercise

- a) Ventilation at Rest and during Exercise.
- b) Ventilation and the Anaerobic Threshold, static and dynamic lung volume.
- c) Gas diffusion
- d) Oxygen and carbon dioxide transport, second wind
- e) Control of pulmonary ventilation during exercise
- f) Adaptive changes in the respiratory systems due to regular physical activities.

II. Cardiovascular responses to exercise

- a) Cardiovascular system and exercise, acute vascular effects of exercise.
- b) Circulatory responses to various types of exercise regulation of cardiovascular system during exercise.
- c) Pattern of redistribution of blood flow during exercise.
- d) Adaptive responses of cardiovascular system to aerobic and anaerobic training.
- e) Athlete heart

Ram Krishore

III. Exercise and Acid Base Balance

- a) Acid and Bases
- b) Buffers
- c) pH
- d) Respiratory Regulation of pH
- e) Alkali Reserve
- f) The kidneys and Acid base balance
- g) Alkalosis and Acidosis
- h) Acid base balance following heavy exercise.

IV. Hormonal responses to exercise with respect to

- a) Growth Hormone (GH),
- b) Thyroid and Parathyroid Hormones.
- c) Anti-diuretic Hormone (ADH) and Aldosterone,
- d) Insulin and Glucagon,
- e) The catecholamine; epinephrine and norepinephrine.
- f) The sex hormones.
- g) The glucocorticoids (Cortisol) and Adrenocorticotrophic Hormones (ACTH).
- h) Prostaglandins and Endorphins:

Master in Physiotherapy (MPT) Second Semester
Advanced Physiotherapeutics-II
Subject Code : MPT-202
Min. Hrs :- 80 Hrs.

COURSE OBJECTIVES: On completion of the subject, students will have the opportunity to develop the skills of intellect decision making. It also provides an extension of their communication skills to articulate the evidence based acquaintance and clinical knowledge for assessment and diagnosis of patients. It is a prospect to the students for the application of the research and professional information to novel situations.

COURSE OUTCOMES: On completion of this subject students should have the opportunity to:

1. Strengthen the basic fundamental basis of assessment and diagnosis and postulate this knowledge in clinical practice.
2. Analyses critical evaluate the patient conditions and formulation of accurate diagnosis.
3. Acquire a thorough understanding of advance concepts of Physiotherapy including Manual therapy and electrotherapy which can be applied in clinical practice.

1. Soft Tissue Techniques and Recent Advances in Manual therapy

(Terminology, Principles, Indications, Contra indications, Assessment and method of Application of the following techniques)

Unit

1. Myofascial release techniques
2. Muscle energy techniques
3. Trigger point release
4. High velocity thrust techniques
5. Positional release techniques
6. Lymphatic manipulations
7. Kinesio Taping

2. Ergonomics

1. History of ergonomics
2. Worker care spectrum
3. Postural examination
4. Job analysis
5. Work hardening programme
6. Exit assessment
7. Pre-employment screening
 - Job analysis
 - Job task analysis
 - Job site analysis
8. Work capacity analysis
9. Role of Physiotherapy in industrial set up
10. Workers functional capacity assessment
11. Industrial therapy
12. Adult education
13. Injury prevention and ergonomics

3. Radiology, Pathology and Diagnostic Studies

1. General studies
2. Principle of reading radiological reports
3. X-Ray, CT Scan and MRI scan in relation with various disorders/diseases
4. Routine examination of sputum, and analysis of the report.
5. Clinical co-relation with various disorders.
6. EEG, evoke potential etc.

Text Books:

1. Johnson, J. C. (2019). Soft Tissue and Trigger Point Release. Human Kinetics.
2. Hendrickson, T. (2020). Massage and Manual Therapy for Orthopedic Conditions. Jones & Bartlett Learning.
3. Duncan, R. (2014). *Myofascial Release*. Human Kinetics.

Master in Physiotherapy (MPT) Second Semester

Biostatistics

Subject Code : MPT-203

Min. Hrs :- 80 Hrs.

COURSE OBJECTIVES:

- To have a thorough understanding of presenting supporting evidences and how to conduct statistical analysis.
- To have an understanding of model of biostatistics.
- To evaluate every procedure on the basis of evidences.
- To understand the data analysis procedure and their significance in research.

COURSE OUTCOMES:

- Students will be able to understand and apply concepts and terminology with in the area of biostatistics.
- Students will be able to describe research design and application of different methods to analyze the data collected to conduct and complete the research. .
- Record, extract and analyze key information about human and object.

BIOSTATISTICS

1. Biostatistics

- Introduction
- Definition
- Types
- Application in Physiotherapy

2. Data

- Definition
- Types
- Presentation
- Collection methods

3. Measures of central value

- Arithmetic mean, median, mode. Relationship between them
- Partitioned values- Quartiles, Deciles, Percentiles
- Graphical determination

4. Measures of Dispersion

- Range
- Mean Deviation
- Standard Deviation

5. Normal Distribution Curve

- Properties of normal distribution
- Standard normal distribution
- Transformation of normal random variables.
- Inverse transformation
- Normal approximation of Bioaxial distribution.

6. Correlation analysis

- Bivariate distribution:
- Scatter Diagram
- Coefficient of correlation
- Calculation & interpretation of correlational coefficient
- T-test, Z-test, P-value

7. Regression analysis

- Lines of regression
- Calculation of Regression coefficient
- Sampling distribution
- Standard error
- Types I & II error

9. Probability (in Brief)

Ram Krishore

Versh

Munish Kumar

Digvijay

10. Hypothesis Testing

- Null Hypothesis
- Alternative hypothesis
- Acceptance & rejection of null Hypothesis
- Level of significance

11. Parametric & non parametric tests

- Chi square test
- Mann-Whitney U test
- Wilcoxon Signed test
- Kruskal-Wallis test
- Friedman test
- T-test/student T test
- Analysis of variance

Master in Physiotherapy (MPT) Semester-II
Practical
Subject Code : MPT-204
Min. Hrs :- 160 Hrs.

COURSE OUTCOME:

It should be aimed for assessing competence and skills of physiotherapeutic intervention and procedures as well as testing students ability to make relevant and valid observations, diagnostic & prognostic interpretations and inference, clinical, laboratory or experimental work relating to this her subject.

1. Assessment, evaluation and diagnosis
2. Practice and application of physiotherapeutic system in hospital/centre/ institution.
3. Application of advance physiotherapeutic maneuvers like manipulation (maitland, cyriax, mulligan etc.) and various neurological interventional concepts (bobath, NDT etc.).
4. Clinical reasoning, decision making, evidence based practice and recording system.
5. Short case from area of elective to assess investigative and diagnostic skills
6. Short case from area of elective to assess patient management skills

Master in Physiotherapy (MPT) Semester-I & II
Teaching Skills/ Seminars/Symposia/Journal Club etc.*
(Common to all specialization/discipline)
Min. Hrs -: 80 Hrs. (Sem-I) + 80 Hrs. (Sem.-II)

(a) Teaching Skills

Candidates should be encouraged to teach undergraduate students if any. This performance will be based on assessment by the faculty members of the department and from feedback from the undergraduate students.

(b) Seminar/Symposia

- Seminars /recent advance presentation will be held every week, however, its timings are subject to clinical schedule. Topics must be well researched and must include common knowledge, recent advances, analysis and references.
- PG students should present minimum of two seminars (One in general and one in elective area) and Internal Assessment marks will depend on better topic selection and presentation.

(c) Journal Review Meeting (Journal Club):

The ability to do literature search, in depth study, presentation skills, and use of audio- visual aids are to be assessed. The assessment is made by faculty members and peers attending the meeting.

(d) Work diary / Log Book

Every student shall maintain a work diary and record his/her participation in the training programmes conducted by the department such as journal reviews, seminars, etc. Special mention may be made of the presentations by the candidate as well as details of clinical practice, if any conducted by the candidate by the student.

Master in Physiotherapy (MPT) Semester-III
Pedagogy in Physiotherapy Education
(Common to all specialization/discipline)
Subject Code : MPT-301
Min. Hrs :- 80 Hrs.

COURSE OBJECTIVES: On completion of the study of this subject the student should be able to understand the dynamics of teaching & learning. Plan effective teaching sessions in Physiotherapy

COURSE OUTCOMES: On completion of this subject students should have the opportunity to:

- a) Strengthen the basic fundamental basis of assessment and diagnosis and postulate this knowledge in clinical practice.
- b) Analyses critical evaluate the patient conditions and formulation of accurate diagnosis.
- c) Acquire a thorough understanding of management and educational methodology in physiotherapy which can be applied in clinical practice.

Following are the topics to be included but not limited to:

1. Education

- Introduction
- Educational Philosophy- Idealism Naturalism, Pragmatism
- Aims of Education
- Functions of Education
- Formal, informal and non-formal Education
- Agencies of Education
- Current issues and Trends in Higher Education
- Issue of quality in Higher Education
- Autonomy and Accountability
- Privatization of Education

2. Concept of Teaching and Learning

- Meaning and scope of Educational Psychology
- Meaning and Relationship between teaching and learning
- Learning Theories
- Dynamics of behavior
- Individual differences

3. Curriculum

- Meaning and concept
- Basis of curriculum formulation
- Framing objectives for curriculum
- Process of curriculum development and factors involved.
- Evaluation of curriculum

4. Method and techniques of teaching

- Lecture
- Demonstration
- Discussion
- Seminar
- Assignment
- Project
- Case Study

5. Planning for teaching

- Bloom's taxonomy of instructional objectives
- Writing instructional objectives in behavioural terms
- Unit planning
- Lesson planning

6. Teaching aids

- Types of teaching aids
- Principles of selection, preparation and use of audio-visual aides

Ram Krishore

Versh

Munish Kashyap

Digvijay

7. Measurement and Evaluation

- Nature of educational measurement: meaning, process, types of tests
- Construction of an achievement test and its analysis
- Standardized test
- Introduction of some standardized tools, important tests of intelligence, aptitude, and personality.
- Continuous and comprehensive evaluation

8. Guidance and counseling

- Meaning & concepts of guidance and counseling
- Principles of guidance and counseling

9. Awareness PROGRAMME

- Awareness and guidance to the common people about health and disease

Text Books

Master in Physiotherapy (MPT) Semester-III
Administration Management & Ethical Issues
(Common to all specialization/discipline)
Subject Code : MPT-302
Min. Hrs -: 80 Hrs.

COURSE OBJECTIVE: On completion of the study of this subject the student should be able to understand the basic issues of Management & Administration. Practice as an informed professional on Legal & ethical issues

COURSE OUTCOMES: On completion of this subject students should have the opportunity to:

- a) Strengthen the basic fundamental basis of management and administration and legal and ethical issues.
- b) Acquire a thorough understanding of management and educational methodology in physiotherapy which can be applied in clinical practice.

SECTION-I

Management:

- Introduction
- Evolution of management
- Functions of management
- Management process – planning, organization, direction, controlling
- Decision-making.

Personnel management:

- Staffing
- Recruitment selection
- Performance appraisal
- Collective bargaining
- Job satisfaction

Marketing:

- Market segmentation
- Channels of distribution
- Promotion
- Consumer behavior

Total Quality Management:

- Basics of quality management
- Quality control
- Quality assurance PROGRAMME in hospitals & medical audit
- International quality system.

SECTION II

Administration, Legal Ethical Issues

- Hospital as an organization - Functions and types of hospitals
- Roles of Physical therapist, Physical therapy Director, Physiotherapy supervisor, Physiotherapy assistant, Physiotherapy aide, Home health aide, Volunteer.
- Rules of Professional Conduct.
- Legal responsibility
- Code of ethics
- Functions of Physiotherapy associations
- Role of the International Health Agencies
- Standards of practice for physiotherapists
- Liability and obligations in the case of medical legal action
- Law of disability & discrimination
- Confidentiality of the Patient's status
- Consumer protection law, health law, MCI, DC

Master in Physiotherapy (MPT) Semester-III
Neurological Disorders & Management-I
Subject Code : MPT-303N
Min. Hrs :- 120 Hrs.

COURSE OBJECTIVE: On completion of the subject, students will have the opportunity to develop the skills of intellect decision making. It also provides an extension of their communication skills to articulate the evidence based acquaintance and clinical knowledge for assessment and diagnosis of patients. It is a prospect to the students for the application of the research and professional information to novel situations.

COURSE OUTCOMES: On completion of this subject students should have the opportunity to:

- a) Strengthen the basic fundamental basis of assessment and diagnosis and postulate this knowledge in clinical practice.
- b) Analyses critical evaluate the patient conditions and formulation of accurate diagnosis.
- c) Acquire a thorough understanding of factors influencing learning including the learner and the environment, and how these factors can be applied in clinical practice.

NEUROLOGICAL DISORDERS

Introduction, etiology, Path physiology, Clinical presentation, conservative management & complications of the following clinical conditions:

- Congenital & hereditary Disorders
- Disorders of cerebral circulation
- Head Injury
- Spinal Cord Injury
- Disorders of Peripheral nerves
- Disorders of cranial nerves
- Disorders of muscles

Investigations

Orientation and Introduction, Physical basis, normal result & common abnormal responses, (in brief)

- Skull X ray
- Computerized Tomography
- Magnetic Resonance Imaging
- Intracranial Pressure monitoring
- Evoked Potentials
- EMG/ NCV
- Lumbar puncture
- Common Laboratory tests in Neurological disorders

NEUROSURGICAL DISORDERS

1. General Principles of neurosurgery
2. Disorders of CSF Fluid & circulation
3. Cerebral malformations
4. Spasticity management
5. Surgical repair of peripheral Nerves
6. Muscle lengthening/ Release
7. Management of an unconscious Patient
8. ICU management of a neurologically ill patient

PHYSIOTHERAPY ASSESSMENT

Perform thorough Physiotherapy assessment & list deficiencies

- Design individualized goals for the patient
- Rationalize the outcome of the assessment
- Document systematic, meaningful, accurate written records of the patient

1. Review of General assessment
2. Assessment of Higher mental functions
3. Neurodevelopment assessment
4. Pain assessment
5. Sensory assessment
6. Assessment of Tone, flexibility, tightness

Ram Krishore

Veer

Manish Kumar

Digvijay

7. Motor Control assessment
8. Muscle Length Testing
9. Postural assessment
10. Limb length measurement
11. Range of Motion

13. Coordination assessment
14. Reflex Testing
15. Cranial nerve testing
16. Nerve Tension testing
17. EMG/ NCV report reading & analysis
18. Clinical Gait assessment
19. Functional assessment
20. Physical disability evaluation (in brief)

PHYSIOTHERAPY MANAGEMENT

Review of Basic Techniques:

1. Stretching
2. Strengthening
3. Passive movements
4. Active exercise training
5. Assisted Resisted Exercise training
6. Resisted exercise training
7. Postural Re-education
8. Electrotherapy Modalities

Advanced Physiotherapy Treatment approaches:

1. Neurodevelopment technique
2. Bobath
3. Vojta
4. Brunnstrom
5. PNF
6. Rood's Approach
7. Pain management
8. Gait Training
9. Wheelchair Prescription
10. Biofeedback
11. Hydrotherapy
12. Relaxation technique
13. Pediatric Neurophysiotherapy
14. Geriatric Neurophysiotherapy
15. Assistive Technologies and its role in Neurorehabilitation
16. Prosthetics and Orthotics in Neurorehabilitation
17. Wheelchair skills- Basic

Master in Physiotherapy (MPT) Semester-IV
Dissertation
Subject Code : MPT-404
(Common to all specialization/discipline)
Min. Hrs :- 120 Hrs.

Every candidate pursuing MPT degree course is required to carry out research work on a selected research project under the guidance of a recognized postgraduate teacher. The results of such a work shall be submitted in the form of dissertation. Topic for dissertation shall be assigned by the guide.

Fulltime recognized PG Teacher/Guide from other institute can act only as a co-guide, If the subject of Thesis entails collaboration with other departments or specialties, the collaborative portion of the work will be supervised by Co-Guide, designated by the School of Health Sciences in consultation with the Guide. Where a Co-Guide is involved, the Thesis will be certified jointly by the Guide & Co-guide.

Every candidate shall submit synopsis to the University in the prescribed Performa containing particulars of proposed dissertation work, within 6 months from the date of commencement of the course on or before the dates notified by the university. The synopsis shall be sent through the proper channel. Such synopsis will be reviewed and the university will register the dissertation topic. No change in the dissertation topic or guide shall be made without prior approval of the university. Guide will be only a facilitator, advisor of the concept and hold responsible in correctly directing the candidate in the methodology and not responsible for the outcome and results.

The dissertation should be written under the following headings.

1. Introduction
2. Aims or objectives of study
3. Review of literature
4. Material and methods
5. Results
6. Discussion
7. Conclusion
8. References
9. Master and Chart & Table (If Applicable)
10. Annexure (If Applicable)

The written text of dissertation/ research project shall not be less than 50 pages and shall not exceed 120 pages excluding references, tables, questionnaires and other annexure. It should be neatly typed in double line spacing on one side of bond paper (A4 size, 8.27" x 11.69") and bound properly. Spiral binding should be avoided. A declaration by the candidate for having done the work himself should also be included, and the guide, head of the department and Director/Coordinator of the institute shall certify the dissertation/ research project.

Every candidate is required to give power point presentation before final submission of dissertation. Four copies of Dissertation/research project shall be submitted to the university, through proper channel, along with a soft copy (CD), 6 months before the final examination. It shall be assessed by two examiners appointed by the university, one internal and one external. There will be a power point open presentation of the submitted dissertation as per the schedule given by the university. This presentation shall be jointly evaluated by external and internal examiner as per the criteria given below:

Objective(s) of the work done	50 Marks

Master in Physiotherapy (MPT) Semester-IV
Teaching Skills/ Seminars/Symposia/Journal Club etc.
(Common to all specialization/discipline)
Min. Hrs -: 80 Hrs.

(a) Teaching Skills

Candidates should be encouraged to teach undergraduate students if any. This performance will be based on assessment by the faculty members of the department and from feedback from the undergraduate students.

(b) Seminar/Symposia

- Seminars /recent advance presentation will be held every week, however, its timings are subject to clinical schedule. Topics must be well researched and must include common knowledge, recent advances, analysis and references.
- PG students should present minimum of two seminars (One in general and one in elective area) and Internal Assessment marks will depend on better topic selection and presentation.

(c) Journal Review Meeting (Journal Club):

The ability to do literature search, in depth study, presentation skills, and use of audio- visual aids are to be assessed. The assessment is made by faculty members and peers attending the meeting.

(d) Work diary / Log Book

Every student shall maintain a work diary and record his/her participation in the training programmes conducted by the department such as journal reviews, seminars, etc. Special mention may be made of the presentations by the candidate as well as details of clinical practice, if any conducted by the candidate by the student.
