

CSJMU CARBON FOOTPRINT REPORT 2022-23

We followed the GHG protocol to calculate the university's carbon emissions for the baseline year 2022-23. Total carbon emissions for Scope 1 & 2 are estimated at 74.44 tonnes & 3389.52 tonnes, respectively; Scope 3 emissions are still being assessed. Baseline year when we started recording our emissions is 2022-23, and we have prepared a sustainability policy to reduce our emissions by 45-50% by the year 2050.

TOTAL EMISSIONS AND INTENSITY METRICS

3464	0.43	0.0077
Total tCO ₂ e	tCO ₂ Per Person	tCO ₂ Per Sq Metre

BASLINE YEAR 2022-23

Sources	Scopes	tCO ₂ emission
LPG consumption	1	60.87
Fleet	1	13.57
Refrigerant leakage	1	N/A
Electricity	2	3389.52
