Routine gynaecological exams by specialized medical doctors are conducted to monitor reproductive health and detect any abnormalities early on. Experts provide counselling and support on sexual health issues.

In addition to the comprehensive range of sexual and reproductive health-care services provided within the Health Centre, access to sanitary products is also crucial for promoting hygiene, comfort, and dignity among individuals. Therefore, institute often ensure the availability of sanitary products within their facilities.

Sanitary products, such as sanitary pads are made accessible and its hygienic disposal is available in restrooms within the department's premises.
