# **IT INTEGRATION AND REFORMS IN THE EXAMINATION PROCEDURES AND PROCESSES**

## **Note on On-Screen Marking System**

**On Screen marking facilitates the evaluation of answer scripts to be done through a secured environment by digitizing the answer scripts first and then enabling the evaluation through our proprietary software application. The process life cycle includes dummy number allocation, digitizing the answer scripts, evaluation and mark entry by the faculty, options for accessing answer keys and moderation and report generation by the Controller of Examination.**

**The evaluated answer scripts are then stored in a central repository for archival at a future date for reevaluation and thus provides complete transparency in the system. These digitized answer scripts are uploaded into the server at the NOC and each authorized evaluator is allotted a predefined number of answer scripts for evaluation. The marks entered by the evaluators are transferred to the university result processing system immediately on completion of the valuation thereby enabling quick publication of results and avoiding any data entry errors and room for malpractices.**

**The primary objective of this initiative is to bring in transparency, efficiency, speed up the evaluation process and reduce the logistic cost. The system enables the preservation of answer scripts for a long time.**

**These digitized answer scripts are uploaded into the server at the NOC and each authorized evaluator is allotted a predefined number of answer scripts for evaluation.**

**Evaluators can evaluate the answer scripts from anywhere within the specified time. During the evaluation process, evaluators can also access reference keys for the questions for easy reference whenever needed. During the entire evaluation process, the identity of students is totally masked to provide secrecy and sanctity to the whole system. There is also an option for payment management for the evaluators.**

### **Key Features:**

- **Secured evaluation process**
- **Masking student identity**
- **Answer scripts retention for longer duration**
- **No loss of answer scripts due to accidents like fire, floods, etc.**
- **Simultaneous evaluation of one answer script by multiple evaluators**
- **No chance of inaccuracies in evaluation and totalling of marks**
- **Easier re-evaluation process**
- **Easy tracking of evaluation process**
