the minds of people. If more inter-caste marriages take place, it will help in changing the social system. By neglecting caste system one cannot think of social transformation.

Different castes in Hinduism observe different practices. The couples compromised above religious practices. Although the people from different religions married one another, the disagreements did not happen about religious practices. But they learnt to respect others religions. In male dominated culture family decision depended on the opinions of men but because of inter-caste and interreligious marriages women got importance in decision making process regarding family matters.

It was observed that every male and female respondent had liberty to behave according to his or her religious, Customs and practices.

No male respondent's regrets for not getting dowry through inter caste - interreligious marriage. It means that inter-caste-interreligious marriages eradicate dowry system.

The conclusions to which the researcher came by studying the problem will help thinkers, leaders, government, social reformers, voluntary organizations, social institutions, organizations, researchers, readers, students, etc... It will help to carry on the work of social awareness.

Considering changing nature of inter-caste-interreligious marriages the research will help the governments in making laws from time to time.

## Role of Emotional Intelligence for Teacher Effectiveness

Gopal Singh

Research Scholar, Department of Education,  
Babasaheb Bhimrao Ambedkar University,  
A Central University, Lucknow, U.P.

### ABSTRACT

The concept of emotional intelligence (EI) is relatively a new idea in popular culture. The term emotional intelligence was launched when people started to realize that a high Intelligence Quotient (IQ) is no guarantee against failure in everyday life. Emotional Intelligence is the ability to understand own emotions and those of people around. The concept of emotional intelligence means must persons have a self-awareness that enables to recognize feelings and manage your emotions. An attempt is made in this paper to analyze the concept of emotional intelligence, benefits of improving EI, teachers' effectiveness in the class room of schools and universities, Role and the qualities of the teachers, Importance of EI for teacher education and ideas for improving the situation of the teachers etc are also discussed.

**Keywords:** Emotional intelligence, Teacher Effectiveness, Teacher Education

### INTRODUCTION

The hope of a nation lies in the proper education of its youth, in preparing the young to fare better in life. Proper education is not only instruction in school subjects and cannot take place in isolation from the emotions of the child. Being Emotionally Intelligent is as important as learning any other subjects. Here Emotional Intelligence means the ability to retain emotional impulses, to read other person's
