

Report on
Two Day visit at National Sugar Institute, Kanpur
Organized by
University Institute of Engineering and Technology
C S J M University, Kanpur

On the 14th and 16th of February 2022, the Department of Chemical Engineering at the University Institute of Engineering and Technology, CSJM University Kanpur, embarked on an educational tour to the National Sugar Institute. Over 60 B.Tech. Chemical Engineering students, accompanied by two faculty members, Dr Vinay Kumar Sachan and Dr Arun K Gupta, and staff member Shri Narendra Sharma, visited the institute's experimental Sugar Factory. This tour provided a valuable experience for all involved, providing our students with an understanding of industrial operations and their actual size and scale. We were warmly welcomed and treated with care by the faculty members and staff on both days. We extend our thanks for your kind permission and for sparing valuable time for our students. We would like to express our gratitude to Prof. Jahar Singh, Prof. Anoop Kannaujia, Prof. Vishnu P. Srivastava, Shri Arun Pandey, and Shri Tejpal for their contributions. We look forward to visiting again and working on joint projects with your institute.
