About the Conference

Wellness is an active process of becoming aware of and making choices towards a healthy & fulfilling life. Wellness is more than being free from illness. It is a dynamic process of change, growth and an overall feeling of well being.

Maintaining an optimal level of wellness is absolutely crucial to live a higher quality of life. Wellness matters because everything we do and every emotion we feel relates to our well-being. In turn, our well-being directly affects our actions and emotions. It is an ongoing circle. Therefore, it is important for everyone to achieve optimal wellness in order to subdue stress, reduce the risk of illness and ensure positive interactions.

There are eight dimensions of wellness: Social, Physical, Emotional, Occupational, Financial, Spiritual, Environmental and Intellectual. Each dimension of wellness is interrelated with another. Each dimension is equally vital in the pursuit of optimum health. One can reach an optimal level of wellness by understanding how to maintain and optimize each of the dimensions of wellness.

Social wellness helps in performing social roles effectively, comfortably and create a support network. This dimension of wellness allows not only to develop encouraging relationships with peers, but also intimate relationships with partners.

Physical wellness relates to maintaining a healthy body and seeking care when needed. Physical health is attained through exercise, healthy eating, getting enough sleep and paying attention to the signs of illness and getting help when needed.

Emotional wellness relates to understanding feelings and coping effectively with stress. It is important to pay attention to self-care, relaxation, stress reduction and the development of inner resources to learn and grow from experiences.

Occupational wellness is about enjoying occupational endeavors and appreciating contributions. This dimension of wellness encourages personal satisfaction and enrichment in one's life through work.

Spiritual wellness allows to develop a set of values that help in seeking meaning and purpose. Spirituality can be attained in many ways, for example, through relaxation or religion. But being spiritually well means knowing which resources to use to cope with issues that come up in everyday life.

Financial wellness involves the process of learning how to successfully manage financial expenses. Money plays a critical role in our lives and not having enough, impacts health as well as academic performance. Financial stress is repeatedly found to be a common source of stress, anxiety and fear for college students.

Environmental wellness inspires us to live a lifestyle that is respectful of our surroundings. This realm encourages us to live in harmony with the Earth by taking action to protect it. Environmental well-being promotes interaction with nature and personal environment. Everyone can have a strong environmental consciousness simply by raising their awareness.

Intellectual wellness involves having an open mind on encountering new ideas and continuing to expand knowledge. It encourages active participation in scholastic, cultural and community activities.

Wellness Con - 2019 focuses on the following theme:

!! Theme !!

THE IIRS OUTREACH PROGRAM
The IIRS outreach programme, which was started in 2007 with 10 universities, has now grown substantially. Currently, 1000 universities / institutions spread across India covering 27 States and 3 Union Territories are networked with IIRS. The beneficiaries of the programme may include:

- Central/State/Private Universities & Academic Institutions
- Mining and geological organisations
- State Remote Sensing Departments
- Research Institutes
- Mineral Exploration Mining Industries
- NGOs

Feedback Mechanism
The participants can submit their feedback through online portal. Feedbacks are critically analysed and implemented in next course. For ease to the feedback the participants and participating organisations are invited to attend annual IIRS User Interactive Meet (UIIM) at IIRS Dehradun.

Awards of Appreciation
IIRS has instituted National awards for excellence in training for outreach and a learning programme during 15th National Symposium on Satellite in Training conducted during April 11-12, 2015 in New Delhi by Department of Personnel & Training (DPT), Govt. of India in collaboration with United Nations Development Programme (UNDP).

About the Course
The Moon provides an excellent opportunity to study the untempered solar-terrestrial processes and serves as a unique platform for understanding the evolution of terrestrial planets. In recent years, the Moon has become a focus of intense scientific interest. The past few decades of intense research in lunar science have resulted in a paradigm shift in our understanding of the Moon. The past few decades of intense research in lunar science have resulted in a paradigm shift in our understanding of the Moon. The past few decades of intense research in lunar science have resulted in a paradigm shift in our understanding of the Moon.

Course Study Material
The course study material includes lecture slides, video recorded lectures, online source software & handouts. The course study material will be made available through IIRS by the time the course will be started.

Course Fee
The course is free of cost.

Course Registration
Course registration and other details will be available on IIRS website (<http://www.iirs.gov.in/Outreach/Registration>).
