Institutional Distinctiveness

Faceless Digital Student Services

Universities often experience delays in issuing mark sheets, degree certificates and other relevant documents due to the bureaucratic process of verifying student information and job organizations. This process can be further complicated and disheartening for the students if duplicate degrees, mark sheets and corrections are to be made. Additionally, students can suffer inconvenience and disruption due to missing out on job opportunities, which can result in career advancement delays. As a result, universities often have to extend the deadlines for issuing degree certificates and students have to wait longer to get their degrees. Just like income-tax faceless system, the university thought to develop a faceless system to streamline the process of acquiring certificates and documents. This could help students obtain their certificates quickly and hassle-free. Therefore, under the support of the Hon'ble Vice Chancellor, the university has started a "Faceless Digital Student Service Portal" to ensure the educational system is efficient, transparent and reliable. CSJMU is the first university in the state to establish such a facility for the benefit of the students.

The university's faceless digital student services portal provides various online services to students on campus and at all-affiliated colleges using a confidential and anonymous system. Through this, students have access to information about their certificates automatically on their dashboards after applying through this portal, and any incorrect information is corrected on their certificates.

Through this portal, students can download relevant documents such as digitally signed degrees, duplicate degrees, migration, provisional certificates, duplicate degrees, and mark sheets. Organizations and students can access a single portal for online educational document verification with digitally signed transcripts and mark sheet correction services.
